Director, Housing and
Demographic Analysis Division

This report presents data from the Annual Housing Survey, which was sponsored by the U.S. Department of Housing and Urban Development and conducted by the U.S. Bureau of the Census. It was prepared primarily under the direction of Duane T. McGough, Director, Housing and Demographic Analysis Division, Department of Housing and Urban Development, and Arthur F. Young, Chief, Housing Division, Bureau of the Census.

Duane T. McGough, assisted by Paul Burke, Connie Casey, and Kathryn Nelson was responsible for overseeing the Annual Housing Survey and the resultant report on behalf of the Department of Housing and Urban Development.

Within the Bureau of the Census, this report was developed in the Housing Division. It was prepared under the supervision of Leonard J. Norry, Assistant Division Chief, by Edward D. Montfort, Chief, Current Surveys Branch, assisted by Paul P. Harple, Jr., and Jane S. Maynard. Specific activities related to data collection procedures, statistical presentation, organization of the report, and preparation of text materials were performed by Edward Cary Bean, Jr., Mary C. Carroll, Donald Evans, Wallace Fraser, Sheryl H. Furman, Stu Kaufman, Vonda Kiplinger, Richard Kreinsen, Ruby Lewis, Gregg Lindner, Watson Pryor, Stanley J. Rolark, Josephine Ruffin, Georgina Torres, Barbara Williams, Elizabeth Williams, and Jeanne M. Woodward. Important contributions were made by Elmo E. Beach in the planning and coordination of the survey.

The operational aspects of the Annual Housing Survey were coordinated by the Demographic Surveys Division under the direction of Marvin M. Thompson, Chief, by Edward F. Knowles, Assistant Division Chief, and John C. Cannon, assisted by Maria A. Mochulski and Helen S. Montagliani. Systems and processing procedures were performed under the direction of Barry M. Cohen, Assistant Division Chief. The computer programming and processing were performed under the supervision of D. Richard Bartlett, assisted by Peggy Goldsmith, Richard Jaronski, Caroline S. Irwin, Denise Dickerson, and James Dallmann. Angel Marshall, assisted by Larry Beasley, Robert Smith, Jr., Patricia Lauria, and David Montgomery, was responsible for the clerical and keying procedures.

The planning of the sample design, weighting, and computation of sampling variances and standard errors was developed in the Statistical Methods Division, under the supervision of

Charles Jones, Chief, and Gary Shapiro, Assistant Division Chief, by Dennis Schwanz, Donald Luery, and Austin Lin. The implementation of the sample selection and computation of sampling variances was performed under the supervision of Robert T. O'Reagan, Assistant Division Chief, by Leonard Baer, Pat Wilson, Florence Abramson, David Diskin, Christine Jorgensen, William Taylor, Robert Jewett, George Train, and Juanita Jones (Data Preparation Division, Jeffersonville, Ind.). The preparation of field sample control and reinterview procedures was performed under the supervision of Robert T. O'Reagan, by John Paletta and Fay Nash. Reinterview design and analysis were conducted under the supervision of Irwin Schreiner, by Dorcas Graham and Phillip Sanchez.

Data collection activities were administered by the Field Division under the supervision of Lawrence T. Love, Acting Chief, by George T. Reiner, Assistant Division Chief, Howard C. Beattie, and William J. Phalen, as well as the directors of the Bureau's regional offices.

Within the Publication Services Division, many individuals made significant contributions in the areas of publication planning and design, editorial review, composition, and printing procurement.

GENERAL

This report presents statistics on financial characteristics of the housing inventory from the 1980 Annual Housing Survey for the United States by inside and outside standard metropolitan statistical areas (SMSA's) and each of the four geographic regions. Data are shown on income, value, and gross rent cross-tabulated by housing and household characteristics. The Annual Housing Survey was designed to provide a current series of information on the size and composition of the housing inventory, the characteristics of its occupants, the changes in the inventory resulting from new construction and from losses, the indicators of housing and neighborhood quality, the characteristics of recent movers, and the characteristics of urban and rural housing units. The survey, performed for the Department of Housing and Urban Development, is authorized under sections 501 and 502(d), 502(e), and 502(f) of the Housing and Urban Development Act of 1970, Title 12, United States Code 1701z-1 and 1701z-2. The Bureau of the Census is authorized under Title 31, United States Code 686, to perform special work or services for Federal agencies.

The statistics presented in this report are based on information from a sample of housing units. The information for the survey was collected by personal interview from August 1980 to December 1980.

This report series consists of six basic parts (see list on page III) issued jointly by the Department of Housing and Urban Development and the Bureau of the Census. Part A provides data on general housing characteristics, part B on indicators of housing and neighborhood quality, cross-classified by financial characteristics, part C on financial characteristics, part D on recent mover households, part E on urban and rural housing characteristics, and part F on energy-related housing characteristics.

The content and procedures of the Annual Housing Survey were determined after consultation with a variety of users of housing data and through field pretesting. A large portion of the subjects covered in this report are the same as those collected in the 1970 Census of Housing; in general, these data are comparable to those shown in the 1970 census reports. In addition, a number of new items were introduced in this survey on subjects such as distance and travel time from home to work for the householder, storm windows and doors, insulation, breakdowns or failures in equipment, and the physical condition of the structure.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233.

Organization of the text—The text consists of this introduction and appendixes A and B, which appear after the data tables. Appendix A describes the geographic area classifications and provides definitions and explanations of the subjects covered in this report. Appendix B presents information on sample design, estimation, and accuracy of the data.

Content of the tables—A series of standard tables presents cross-tabulations of the data for occupied housing units for each area shown in this report. The finding guide (following appendix B) lists the characteristics covered in this report and shows the tables in which the various types of statistics appear. The numbers presented in these tables are rounded to the nearest thousand. Table 1 presents characteristics for owner- and renter-occupied housing units by income of the family or primary individual; table 2, characteristics for owner-occupied, 1-unit structures by value of property; and table 3, characteristics for renter-occupied housing units by gross rent. The same

subject content as shown in tables 1 through 3 is presented for housing units with Black householder in tables 4 through 6 and for housing units with Spanish-origin householder in tables 7 through 9.

The prefix letter "A" has been assigned to the tables for the United States as a whole, "B" to the Northeast Region, "C" to the North Central Region, "D" to the South Region, and "E" to the West Region.

Sample size—The statistics presented in this report are based on a sample of housing units and are, therefore, subject to sampling variability. The designated sample consisted of approximately 82,000 housing units located throughout the United States. The sample was selected from units enumerated in the 1970 census and updated to include units constructed since 1970. Detailed information on the sample design, size of sample, estimation procedure, and sampling variability associated with these data are given in appendix B.

Derived figures (median, etc.)—Shown in this report are medians, means, and ratios. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts—one-half the cases fall below the median and one-half the cases exceed the median. Derived figures are not presented (but indicated by three dots . . .) if there are less than 25 sample cases in the distribution or the base.

Medians for rooms and persons are rounded to the nearest tenth, for value and income to the nearest hundred dollars, and for rent to the nearest dollar. In computing medians for rooms and persons per housing unit, the whole number is used as the midpoint of the interval; for example, the category "4 rooms" is treated as an interval ranging from 3.5 up to 4.5 rooms. In computing median rent, units reported as "no cash rent" are excluded. The medians are generally computed on the basis of the distribution as shown in this report.

The mean real estate taxes last year is rounded to the nearest dollar and is computed on the basis of the distribution as tabulated.

When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; for example, if the median falls in the category "Less than \$3,000," it is shown as \$3,000—. When the median falls in the upper terminal category of an open-ended distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; e.g., if the median falls in the category "\$75,000 or more," it is shown as \$75,000+.

The medians and percents for 1980 are generally computed on the basis of the distributions as shown in the tables. As a result a median or percent for the same characteristic and universe may vary between tables. The medians and percents shown for 1970 are computed on the basis of the distributions as tabulated in 1970, which are sometimes more detailed than the distributions shown in this report.

Symbols—A dash (—) signifies zero. Three dots (. . .) in a data column mean not applicable or that the base for a derived figure is too small for it to be shown.

Boundaries—The data shown in this report relate to the areas as defined for the 1970 census. See appendix A for a discussion of these areas. Additional information and definitions of the 1970 boundaries are given in the 1970 Population Census PC(1)-A reports.

Other reports from the Annual Housing Survey—In addition to the six basic reports in the Annual Housing Survey Series H-150, one or more supplementary reports (Series H-151) may be published for the United States.

A series of reports (H-170) similar to H-150 has been published for 60 selected standard metropolitan statistical areas (SMSA's). Data for the SMSA's are based on an independent sample of the 60 SMSA's originally divided into 3 groups of approximately 20 each, with 1 group interviewed every 3 years on a rotating basis.

In 1978 these 3 groups were revised into 4 groups of 15 each and designated as groups I, II, III, and IV. A list of the original 3 groups follows. The number beside each SMSA indicates the revised groupings. Reports are now available for Group A (1974 and 1977), Group B (1975), and Group C (1976) SMSA's.

ADDITIONAL DATA

Unpublished tabulations—A large number of tabulations, not included in the Annual Housing Survey published reports, have been prepared to meet special needs of both national (Series H-150 and H-151) and SMSA (Series H-170 and H-171) data users. These unpublished data are available in two forms. Paper photocopies are available for specific tables at the cost of reproduction. Microfilm copies of these unpublished data are also available on a cost per reel basis. An index to the data available can be obtained free of charge. The unpublished index or data may be obtained by contacting the Housing Division, Bureau of the Census, Washington, D.C. 20233.

Public-use computer tapes—For the data users whose needs are not met by available tabulations, the Census Bureau also has available computerized microdata computer tapes (with individual respondent records) from both the SMSA and national samples. Except for names and addresses, the AHS microdata provide essentially all the information obtained from each occupied or vacant housing unit. The Census Bureau's confidentiality guidelines prescribe that individuals and specific addresses remain anonymous.

Confidentiality guidelines further prescribe that individual records cannot be associated with areas having fewer than 250,000 people based on 1970 census results. The national tapes identify the 4 census regions, each SMSA of 250,000 or more population (central cities are also identified where possible), metropolitan/nonmetropolitan location, and urban/rural location. The SMSA tapes contain data from all SMSA samples except Saginaw, Mich., which contained less than the

250,000 required 1970 population. Central cities are identified for 42 of the 59 SMSA's.

Microdata computer tapes from the Annual Housing Survey are available on a cost per reel basis from the Data User Services Division, Customer Services (Tapes), Bureau of the Census, Washington, D.C. 20233.

Microfiche of published reports—Microfiche copies of national and SMSA published reports are available from Data User Services Division, Customer Services (Microfiche), Bureau of the Census, Washington, D.C. 20233.

DATA COLLECTION PROCEDURES

The 1980 Annual Housing Survey was conducted by interviewers who made personal visits to each sample unit and obtained the information from the occupants or, if the unit was vacant, from informed persons (landlords, rental agents, or knowledgeable neighbors). The information reported by the interviewer reflected the situation at the time of the survey, which began in mid August 1980 and extended through December 1980.

Data were collected for sample housing units located in the counties and independent cities comprising the 461 sample areas

used in current surveys of the Census Bureau. A sample of housing units was selected in these areas from the 1970 census and updated by a sample of addresses from building permits to include housing units added since 1970. Estimates of the counts and characteristics of the 1980 inventory were obtained for these sample units.

A more detailed description of the survey design and sampling procedures can be found in appendix B.

PROCESSING PROCEDURES

The questionnaires used for the 1980 Annual Housing Survey were of the conventional type, on which the interviewer recorded the information by marking a precoded check box or by writing in the entries. Census clerks edited and coded the questionnaires. The information from the questionnaires was data keyed directly to magnetic tape which was processed on the Census Bureau's computers through a number of editing and tabulating steps. A facsimile of the questionnaire appears in appendix A.

QUALIFICATIONS OF THE DATA

Since the estimates in this report are based on a sample, they may differ somewhat from the figures that would have been

**Included with Group B for the first interview.

obtained from a complete census, using the same questionnaires, instructions, and interviewers. Particular care should be exercised, therefore, in the interpretation of figures based on relatively small numbers of sample cases as well as small differences between figures. As in any survey work, the results are subject to errors of response and nonreporting and to sampling variability. For a further discussion of accuracy of the data, see appendix B.

The concepts and definitions of most of the items in this report are essentially the same as those used for the 1970 and 1980 censuses. The SMSA boundaries are the same as those in the 1970 census. For historical comparisons and boundary changes, refer to the census reports of 1960 and earlier.

In making comparisons between the 1980 Annual Housing Survey and the 1970 and 1980 Census of Housing results, differences in the data may reflect such factors as the use of direct interview for the 1980 AHS contrasted with the extensive use of self-enumeration in the censuses, sample design, estimation procedures used, sampling variability of the estimates, and the processing procedures. See the sections on "Comparability with 1970 Census of Housing data," and "Comparability with 1980 Census of Housing data," in appendix A for further discussion.

In addition, according to the 1970 Census Evaluation and Research Program, the 1970 count of 68.7 million housing units is understated by approximately 1.5 million units which were missed in the 1970 census. See the section on "Estimates of Change in the Inventory" in the summary of findings, Series H-150-73A, *General Housing Characteristics*, and Series PHC(E)-5, *The Coverage of Housing in the 1970 Census*, for further discussion.

Statistics on value, rent, and income for both 1970 and 1980 are measured in current dollars (the value at the time the data were collected). Therefore, a significant part of the increase between 1970 and 1980 reflects the 118.3 percent rise in the

cost of living during the 10½ year period, as measured by the Consumer Price Index, as well as changes in the housing inventory.

In this report, statistics on income relate to the income of the family or primary individual. Therefore, no data are provided on household income; i.e., income of persons unrelated to the householder is excluded.

Statistics for some of the characteristics shown in this report are based on restricted universes and, therefore, care should be exercised in relating the statistics for one characteristic to another. For example, value is restricted to owner-occupied, 1-unit structures on less than 10 acres having no business on the property, and gross rent is restricted to renter-occupied units excluding 1-unit structures on 10 acres or more. Therefore, the totals for owner-occupied units in the "value" universe and for renter-occupied units in the "gross rent" universe do not agree with the totals for some of the income universes.

Care should be exercised in the interpretation of differences in the estimated counts of Spanish-origin households between 1970 and 1980. Research indicates that 1970 estimates of Spanish-origin households may be significantly overstated in the South Region and North Central Region. Apparently some respondents in the 1970 census misinterpreted the Spanish-origin category, "Central or South American" to mean the central or southern part of the United States. The method of data collection used in the Annual Housing Survey; i.e., personal interviews conducted by trained interviewers, would tend to prevent the reoccurrence of this 1970 census classification error. In addition, differences between the two sets of data may reflect factors such as the sampling variability of both the 1970 estimates from the 5-percent census sample and the 1980 estimates from the Annual Housing Survey sample, as well as the estimation and processing procedures used.

See appendix A for a more detailed discussion on the definitions and qualifications of all items in this report.

				FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1980	App-16

AREA CLASSIFICATIONS

Urban and rural residence—Urban housing comprises all housing units in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, urban housing consists of all housing units in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those housing units in the rural portions of extended cities; (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. Housing units not

classified as urban constitute rural housing. Information on the historical development of the urban-rural definition appears in the 1970 Population Census PC(1)-A reports.

In the Annual Housing Survey, the urban and rural residence classification of the housing units is the same as in the 1970 census.

Farm-nonfarm residence—In rural areas, occupied housing units are subdivided into rural-farm housing, which comprises all rural units on farms, and rural-nonfarm housing, which comprises the remaining rural units. Occupied housing units are classified as farm units if they are located on places of 10 or more acres

from which sales of farm products amounted to \$50 or more during the 12-month period prior to the interview or on places of less than 10 acres from which sales of farm products amounted to \$250 or more during the 12-month period prior to the interview. Occupied units in rural territory which do not meet the definition for farm housing are classified as nonfarm. All vacant units in rural areas also are classified as nonfarm.

Counties—The primary divisions of most of the States are termed counties; in Louisiana, the corresponding areas are termed parishes. Alaska has no counties; in this State, areas designated as census divisions have been defined for general statistical purposes by the State in cooperation with the Census Bureau and are treated as county equivalents. Four States (Maryland, Missouri, Nevada, and Virginia) contain one or more cities that are independent of any county; for statistical purposes, these independent cities are treated as county equivalents.

Standard metropolitan statistical areas—The definitions of standard metropolitan statistical areas (SMSA's) used in the Annual Housing Survey correspond to the 243 SMSA's used in the 1970 census. These include the 228 SMSA's defined and named in the Bureau of the Budget publication, *Standard Metropolitan Statistical Areas: 1967*, U.S. Government Printing Office, Washington, D.C. 20402. After 1967, 15 SMSA's were added, of which 2 were defined in January 1968, and an additional 13 were defined in February 1971 as a result of the 1970 census. Changes in SMSA definition criteria, boundaries, and titles made after February 1971 are not reflected in this series of reports. SMSA's are defined by the Office of Management and Budget (formerly Bureau of the Budget).

Except in the New England States, a standard metropolitan statistical area is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see the Bureau of the Budget publication cited in the preceding paragraph.

In this report, figures for "in central cities" refer to all housing units within the legal city boundaries. For a few central cities, the figures include some housing units in parts of the city classified as rural in the 1970 census.

DEFINITIONS AND EXPLANATIONS OF SUBJECT CHARACTERISTICS

General

As stated in the introduction, the 1980 Annual Housing Survey was conducted by personal interview. The survey

interviewers were instructed to read the questions directly from the questionnaire. The definitions and explanations given for each subject are, to a considerable extent, drawn from various technical and procedural materials used in the collection of the data. This material helped the field interviewers to understand more fully the intent of each question and thus to resolve problem or unusual cases. Additional explanatory information has been added to this portion of the text to assist the user in understanding the statistics.

Comparability with 1973 through 1979 Annual Housing Surveys—Most of the concepts and definitions used in the 1973 through 1980 reports are essentially the same. However, there are significant differences in the measurement of housing losses between the 1973 report and the 1974 through 1980 reports. In the 1974 through 1980 reports, the data refer to losses of individual housing units, but, in 1973, a housing unit was counted as a loss only when the whole structure in which the unit was located was lost from the inventory. In addition, the source of the 1970 data in the 1974 through 1980 reports is the 1970 census unpublished tabulations; however, the 1970 data in the 1973 report are from both published and unpublished tabulations.

Additional differences, if any, are discussed under the particular subject later in the section. Because of the relatively small sample size, particular care should be taken in making year to year comparisons, especially where there are small differences between the figures (see appendix B).

Comparability with 1970 Census of Housing data—The concepts and definitions are essentially the same for items that appear in both the 1970 census and the 1980 survey.

There is a major difference, however, in the time period of the "recent mover" classification (see parts D and E of this series). In the Annual Housing Survey, "recent movers" are households that moved into their unit during the 12 months prior to the interview, a time period of 1 year or less. In the 1970 Census of Housing reports, different time periods were used. In Volume II, *Metropolitan Housing Characteristics*, the shortest time period for "year moved into unit," is "1969 to March 1970" (1 1/4 years); in Volume IV, *Components of Inventory Change*, the period is 1969 to December 1970 (approximately 2 years); and in Volume VII, No. 5, *Mover Households*, the time period is April 1965 to March 1970 (approximately 5 years).

Other definitional differences, if any, are discussed under the particular subject.

Additional differences between the 1980 Annual Housing Survey data and the 1970 census data may be attributed to several factors. These include the extensive use of self-enumeration in the census in contrast to personal interview in the Annual Housing Survey; differences in processing procedures; the estimation procedures and sample designs; the sampling variability of the estimates from the Annual Housing Survey; to a smaller extent, the sampling variability associated with the sample data from the census; the nonsampling errors

associated with the Annual Housing Survey estimates; and the nonsampling errors associated with the census data.

Statistics on counts and characteristics of changes in the housing inventory between the 1960 and 1970 censuses are given for the United States and for 15 selected SMSA's in the 1970 Census of Housing, Volume IV, *Components of Inventory Change*. In volume IV the data are based on information for a sample of housing units enumerated in late 1970 as part of the 1970 census. Data are provided for such components of change between 1960 and 1970 as new construction, conversions, other additions, demolitions, mergers, other losses, and housing units that were the same in 1960 and in 1970.

In parts A and E of this series, data for some of these components are shown; i.e., new construction, demolition (or disaster), and other losses (some other means). The 1980 data on new construction were obtained primarily from a sample of units selected from building permits. The 1970 *Components of Inventory Change* data were obtained from the 1970 census tabulations of the "year structure built" item; i.e., housing units built in 1960 or later were classified as added by "new construction."

Data as of 1971 for "mortgage status," "real estate taxes last year," and "selected monthly housing costs" are presented in the 1970 Census of Housing, Volume V, *Residential Finance*. In volume V, the data are based on information collected for a sample of housing units in the Residential Finance Survey which was conducted in 1971 as part of the 1970 census. The 1971 report provided data on financing homeowner and rental properties, including characteristics of the mortgages, properties, and owners.

Differences in the concepts and definitions between the data in this report and volume V include the following. The basic unit of tabulation in this report is the housing unit; in volume V, it is the property. Data on mortgage in this report are based on the occupant's answer; in volume V, mortgage status was verified by the lender. In this report, real estate taxes and selected monthly housing costs reflect the total amount of real estate taxes and housing costs, excluding special assessments. In volume V, the tabulations for real estate taxes and selected monthly housing costs *include* special assessments.

Comparability with 1980 Census of Housing data—Most of the concepts and definitions are the same for items that appear in both the 1980 census and the 1980 Annual Housing Survey (AHS).

There are two significant differences, however, in the housing unit definition. First, in the 1980 AHS, the housing unit definition requires a unit to be separate living quarters, having either direct access or complete kitchen facilities. For the 1980 census, the complete kitchen facilities alternative was dropped with direct access required of all units. Second, in the 1980 census, vacant mobile homes are included in the housing inventory provided they are intended for occupancy on the site where they stand. In the 1980 AHS, all vacant mobile homes are excluded from the housing inventory.

There are several other major differences between the 1980 census and the 1980 AHS. In the 1980 AHS, living arrangements containing five or more persons, not related to the

person in charge, were classified as group quarters. In the 1980 census, the requirement was raised to nine or more persons not related to the person in charge.

Owner-occupied cooperatives were identified in the 1980 AHS. These units were not identified separately in the 1980 census, but were included in the overall count of owner-occupied units. The 1980 census will provide data on vacant-for-rent and renter-occupied condominium units.

Additionally, in the 1980 AHS, complete plumbing facilities and telephone available need only to be located in the structure in which the housing unit is located. In the 1980 census, these items must be inside the specific housing unit. Other definitional differences are discussed under the particular subject.

Additional differences between the 1980 Annual Housing Survey data and the 1980 census data may be attributed to several factors. These include the extensive use of self enumeration in the census in contrast to personal interview in the Annual Housing Survey; differences in processing procedures; the estimation procedures and sample designs; the sampling variability of the estimates from the Annual Housing Survey; to a smaller extent, the sampling variability associated with the sample data from the census; the nonsampling errors associated with the Annual Housing Survey estimates; and the nonsampling errors associated with the census data.

Comparability with 1970 and 1980 Censuses of Population data—In the 1970 and 1980 censuses, data for years of school completed were based on responses to two questions—the highest grade or year of regular school each household member attended, and whether or not that grade or year was completed. In the 1980 Annual Housing Survey, data for years of school completed were based on responses to a single question—the highest grade or year of regular school completed by the householder. Therefore, the 1980 Annual Housing Survey may overstate the education level of the householder; that is, respondents may have reported the grade or year the householder was currently enrolled in or had last been enrolled in whether or not the grade or year was completed.

Other definitional differences, if any, are discussed under the particular subject.

Comparability with other current reports—This series of reports contains information similar to that contained in some of the other current Census Bureau reports, such as the Current Housing Report, *Housing Vacancies*, the Current Population Reports, and the Current Construction Reports, published by the Bureau of the Census. Because of procedural differences, care should be taken when comparing data from the Annual Housing Survey with data from other current surveys.

Comparability with Housing Vacancy Survey—Data on vacancy rates and characteristics of vacant units from the Housing Vacancy Survey are available for the United States by inside and outside standard metropolitan statistical areas. This nationwide survey, with a sample size of approximately 78,000 units (interviews obtained for approximately 70,000 occupied and vacant housing units), is conducted monthly by the Bureau of

the Census in conjunction with its Current Population Survey. Data are published quarterly and annually in Current Housing Reports, Series H-111, *Housing Vacancies*.

The concepts and definitions used in the 1980 Annual Housing Survey and the Housing Vacancy Survey are the same. Differences may be attributed to factors such as sampling variability, nonsampling errors, survey techniques, and processing procedures.

Current Population Reports from the Current Population Survey—The Current Population Survey is a monthly sample survey of approximately 78,000 designated sample units. From the data collected in the Current Population Survey, the Bureau issues several publications under the general title Current Population Reports. Included are reports on household and family characteristics, mobility of the population, and income.

Although the concepts and definitions used in this report are essentially the same as those used in the Current Population Reports, and the intent of both the Annual Housing Survey and the Current Population Survey is the same, there is a major difference in the concept of "mover." In parts D and E, householders that moved into their units during the 12 months prior to the interview are classified as "recent movers." In the Current Population Survey, individuals whose current place of residence is different from that of March 1970 are classified as "movers."

There also may be significant differences in the data on income and years of school completed. The time period covering income data in this series of reports refers to the 12 months prior to the date of the interview, while the time period for income data in the Current Population Survey refers to the calendar year prior to the date of the interview. There are also significant differences in the way income questions are asked. For "years of school completed by householder," the difference cited in the section, "Comparability with 1970 Census of Population data," also apply to the Current Population Survey.

Additional differences between the 1980 Annual Housing Survey and the Current Population Survey may be attributed to factors such as the sampling variability and nonsampling errors of the figures from the two surveys, survey procedures and techniques, and processing procedures.

Current Population Reports from the Survey of Purchases and Ownership—The 1974 Survey of Purchases and Ownership is a sample survey covering approximately 20,000 of the designated sample units in the 1974 Annual Housing Survey. Data were collected on ownership, availability, and recent purchases of automobiles and other vehicles, television sets, and selected major household appliances. Information on the price paid is obtained for recently purchased items. The data can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233.

Although the Survey of Purchases and Ownership was taken in conjunction with the Annual Housing Survey, there are differences in the concepts and definitions between the two. For example, the data on automobiles and other four-wheel vehicles, such as pickup trucks and passenger vans, collected in

the Survey of Purchases and Ownership reflect the number of such vehicles that are owned or being bought by a member of the family. The data collected in the Annual Housing Survey reflect the number of automobiles and trucks owned or regularly used by any member of the household, including nonrelatives. Additional differences may be attributed to such factors as estimation procedures, sampling variability, and nonsampling errors.

Current Construction Reports from the Survey of Construction and Survey of Residential Alterations and Repairs—The Census Bureau issues several publications under the general title, Current Construction Reports. The data for these reports are primarily from the Survey of Construction and Survey of Residential Alterations and Repairs.

The Survey of Construction consists of approximately 16,000 permit-issuing places throughout the United States. The reports from the survey contain current data on housing starts and completions, construction authorized by building permits, housing units authorized for demolition in permit-issuing places, new one-family homes sold and for sale, characteristics of new housing, and value of new construction put in place. The concepts and definitions used in this report differ from some of those used in the Survey of Construction. The major difference is that the Survey of Construction shows counts and characteristics of housing units in various stages of construction through completion. The Annual Housing Survey shows counts and characteristics of the existing housing inventory. Additional differences between the 1980 Annual Housing Survey and the Survey of Construction may be attributed to factors such as the sampling variability and nonsampling errors of the figures from the two surveys, survey procedures and techniques, and processing procedures.

The survey of Residential Alterations and Repairs is a sample survey of approximately 4,500 designated owner-occupied properties. Data are collected on expenditures by property owners for upkeep and improvement of residential properties including renter-occupied housing units, single as well as multiunit structures, and units on 10 acres or more. The data on alterations and repairs in this report are restricted to 1-unit structures on less than 10 acres and no business on property. For additional information on the Survey of Residential Alterations and Repairs, see Current Construction Reports, Series C50, *Residential Alterations and Repairs*.

Living Quarters

Living quarters are classified as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (e.g., a single-family home, apartment house, hotel or motel, boarding house, or mobile home or trailer). Living quarters may also be in structures intended for non-residential use (e.g., the rooms in a warehouse where a watchman lives), as well as in places such as tents, caves, and old railroad cars.

Housing units—A housing unit is a house, an apartment, a group of rooms, or a single room occupied or intended for occupancy

as separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other persons in the structure and which have either (1) direct access from the outside of the building or through a common hall which is used or intended to be used by the occupants of another unit or by the general public or (2) complete kitchen facilities for the exclusive use of the occupants. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on group quarters). For vacant units, the criteria of separateness, direct access, and complete kitchen facilities for exclusive use are applied to the intended occupants whenever possible. If the information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that mobile homes, trailers, tents, caves, boats, railroad cars, and the like, are included only if they are occupied.

Group quarters—Group quarters are living arrangements for institutional inmates or for other groups containing five or more persons not related to the person in charge. Group quarters are located most frequently in institutions, boarding houses, military barracks, college dormitories, fraternity and sorority houses, hospitals, monasteries, convents, and ships. A house or apartment is considered group quarters if it is shared by the person in charge and five or more nonrelatives, or, if there is no person in charge, by six or more unrelated persons. Information on the housing characteristics of group quarters was not collected.

Rules for mobile homes, hotels, rooming houses, etc.—Mobile homes or trailers, tents, boats, or railroad cars are not considered housing units if vacant, used only for business, or used only for vacations.

Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents; i.e., persons who consider the hotel as their usual place of residence or have no usual place of residence elsewhere. Vacant rooms or suites of rooms are classified as housing units only if located in hotels, motels, and similar places in which 75 percent or more of the accommodations are occupied by permanent residents.

If any of the occupants in a rooming or boarding house live and eat separately from everyone else in the building and have either direct access or complete kitchen facilities for exclusive use, their quarters are classified as separate housing units. The remaining quarters are combined. If the combined quarters contain four or fewer roomers unrelated to the householder, they are classified as one housing unit; if the combined quarters contain five or more roomers unrelated to the householder or person in charge, they are classified as group quarters. In a dormitory, residence hall, or similar place, living quarters of the supervisory staff and other employees are separate housing units if they satisfy the housing unit criteria; other living quarters are considered group quarters.

Institutions—Living quarters of staff personnel are separate housing units if they satisfy the housing unit criteria. Other living quarters are considered group quarters.

Year-round housing units—Data on housing characteristics are limited to year-round housing units; i.e., all occupied units plus vacant units which are intended for year-round use. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain reliable information for them. However, this report does present counts of the total housing inventory which includes all vacant, seasonal, and migratory housing units.

The statistics in the 1974 through 1980 reports shown for "all year-round housing units" may not be comparable to the corresponding data shown in the 1973 reports, because the 1974 through 1980 tabulations included an estimation procedure which adjusted the survey counts of "vacant year-round" and "vacant—seasonal and migratory" units separately to independent current estimates. (See section on "Estimation" in Appendix B—Source and Reliability of the Estimates.) In 1973, "vacant—seasonal and migratory" units were combined with several categories of year-round vacancies (rented or sold, not occupied; held for occasional use; and other vacant) and adjusted to the combined total of the independent estimates for these categories. Thus, the 1974 through 1980 data for "vacant—seasonal and migratory" housing units and for "all year-round housing units" adhere more closely to the independently derived current estimates than they did in 1973. The 1974 through 1980 characteristics for "all occupied units," "owner occupied," and "renter occupied" are, however, comparable with the corresponding 1973 data.

Changes in the Housing Inventory

Units added by new construction—A housing unit built in April 1970 or later is classified as a unit added by "new construction." Information was collected on vacant units under construction at the time of the interview only if construction had proceeded to the point that all exterior windows and doors were installed and final usable floors were in place. Housing units built during this period but removed from the housing inventory before the interview are not reflected in the new construction counts for the 1970 to 1980 period. In the Annual Housing Survey, data on new construction were obtained primarily from a sample of units selected from building permits; in the 1970 Census of Housing, Volume IV, *Components of Inventory Change*, new construction data were obtained from tabulations of the 1970 census sample records of units built 1960 or later.

Units lost from the inventory—Characteristics are presented for the total of all units removed from the 1973 housing inventory in 1973 or later through demolition or disaster and through other means. Separate counts of "demolition or disaster" losses and of "other losses" are shown in part A of this series. The 1974 through 1980 surveys cover all losses, including those in structures that were not completely lost.

Units lost through demolition or disaster—A housing unit which existed in October 1973 and was torn down on the initiative of a public agency or as a result of action on the part of the owner is classified as a unit lost through demolition. Units destroyed by fire, flood, or other natural causes are classified as units lost through disaster. In the 1973 survey, a housing unit was counted as a demolition or disaster loss when the whole structure in which it was located was lost from the inventory. In the 1974 through 1980 surveys and in the 1970 Census of Housing, Volume IV, *Components of Inventory Change*, the data on losses refer to all housing unit losses, including losses of units in structures which still contained one or more housing units. In addition, units lost through disaster were counted in 1970 as "units lost through other means."

Units lost through other means—Any housing unit which existed in October 1973 is counted as lost through other means when it was lost from the housing inventory through means other than demolition or disaster. This component includes the following types of losses:

1. Units lost by change to group quarters; for example, a housing unit that was occupied by a family in 1973 and by a family and five lodgers at the time of the 1980 survey.
2. Units lost from the inventory because they are vacant and either the roof, walls, doors, or windows no longer protect the interior from the elements or the unit is severely damaged by fire.
3. Vacant units lost from the inventory because there is positive evidence (sign, notice, mark on the house or block) that the units are scheduled for demolition or rehabilitation or that they are condemned for reasons of health or safety so that further occupancy is prohibited.
4. Units lost by change to entirely nonresidential use.
5. Units moved from site since October 1973. Such moves in the same area do not necessarily result in a net loss from the total inventory since they presumably represent units added in the place to which they were moved.

In the 1973 Annual Housing Survey, a housing unit was counted as lost through other means when the entire structure in which it was located was lost to the housing inventory through means other than demolition or disaster. In the 1974 through 1980 surveys, the data on losses refer to all housing unit losses including losses of units in structures which still contained one or more housing units.

Unspecified units—There are other components of change in the housing inventory for which the Annual Housing Survey provides no specific measures. The survey procedures do not include a measure of conversions and mergers and units added from other sources such as nonresidential structures. The net effect of these omissions on the change in the total housing inventory is not known.

Units changed by conversion—Conversion refers to the creation of two or more housing units from fewer units through structural alteration or change in use. Structural alteration includes such changes as adding a room or

installing partitions to form another housing unit. Change in use is a simple rearrangement in the use of space without structural alteration, such as locking a door which closes off one or more rooms to form a separate housing unit.

Units changed by merger—A merger is the result of combining two or more housing units into fewer units through structural alteration or change in use. Structural alteration includes such changes as the removal of partitions or dismantling of kitchen facilities. Change in use may result from a simple rearrangement of space without structural alteration, such as unlocking a door which formerly separated two housing units. A change in use also occurs, for example, when a family occupies both floors of a house which formerly contained a separate housing unit on each floor.

Units added through other sources—Any housing unit added to the inventory through sources other than new construction or conversion is classified as a unit added through other sources. This component includes units created from living quarters previously classified as group quarters and units created from nonresidential space such as a store, garage, or barn. Also included are units moved from one site to another. Such units, if moved within the same area, do not necessarily result in a net addition to the total inventory since they presumably represent units lost in the place from which they were moved. A previously vacant mobile home or trailer, whether on a different site or the same site, is a net addition if currently occupied as a housing unit.

Occupancy and Vacancy Characteristics

Population in housing units—Included are all persons living in housing units. Persons living in group quarters are excluded.

Occupied housing units—A housing unit is classified as occupied if a person or group of persons is living in it at the time of the interview or if the occupants are only temporarily absent—for example, on vacation. However, if the unit was occupied entirely by persons with a usual place of residence elsewhere, the unit is classified as vacant. By definition, the count of occupied housing units is the same as the count of households.

Race—The classification of "race" refers to the race of the householder occupying the housing unit. However, the concept of race as used by the Census Bureau does not denote clear-cut scientific definitions of biological stock. The interviewer was to report the race of the householder in three categories: White, Black (Negro), and other. The last category includes American Indian, Chinese, Eskimo, Japanese, Korean, and any other race except White and Black. Figures on tenure are given separately for White and Black householders; units with householders of other races are included in the total in table 1 of parts A and E and may be derived by subtracting the sum of White and Black from the total. More detailed characteristics of units with Black householder are presented in separate tables. The classification of race in the Annual Housing Survey was

made by the interviewer based on his own observation. In the 1970 and 1980 censuses, race was essentially a self-classification by people according to the race with which they identified themselves.

Spanish origin—The classification "Spanish origin" refers to the origin of the householder occupying the housing unit. Detailed characteristics of units with householder of Spanish origin are presented in separate tables. Spanish origin was determined on the basis of a question that asked for self-identification of a person's origin or descent. Respondents were asked to select their origins from a "flash card." Persons of Spanish origin were those who indicated that their origin was either Mexican American, Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central or South American, or other Spanish.

Care should be exercised in the interpretation of differences in the estimated counts of Spanish-origin households between the 1980 Annual Housing Survey, the 1970 census, 1980 census, and other current surveys. In the 1970 census and current surveys' reports, Spanish persons are identified according to various criteria: Birthplace, birthplace of parents, language, surname, and origin or descent. In addition, research indicates that 1970 estimates of Spanish-origin households may be significantly overstated in the South Region and North Central Region. In the 1980 census the categories are essentially the same as the 1980 AHS, except the category "Central or South American" has been dropped.

Tenure—A housing unit is "owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. A cooperative or condominium unit is "owner occupied" only if the owner or co-owner lives in it. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent.

Site tenure—Separate data are available on tenure of mobile home and trailer sites. Site tenure for owner-occupied mobile homes and trailers is restricted to mobile homes and trailers on less than 10 acres. The site is owned if the occupants own or are buying the site on which the mobile home is located. The site is considered rented if the occupants pay a rental fee for the use of the site, the site rent is paid by someone not living in the sample housing unit, or the occupants neither own nor pay cash rent for the site.

Cooperatives and condominiums—A cooperative is a type of ownership whereby a group of housing units are owned by a corporation of member-owners. Each individual member is entitled to occupy an individual housing unit and is a shareholder in the corporation which owns the property.

A condominium is a type of ownership that enables a person to own an apartment or house in a project of similarly owned units. The owner has the deed and very likely the mortgage on the unit occupied. The owner may also hold common or joint ownership in some or all common areas such as grounds, hallways, entrances, elevators, etc.

Cooperative or condominium ownership may apply to various types of structures including single-family houses, rowhouses, townhouses, etc., as well as apartment buildings.

Year householder moved into unit—The data are based on the information reported for the householder and refer to the year of latest move. Thus, if the householder moved back into a housing unit previously occupied, the year of the latest move was to be reported; if the householder moved from one apartment to another in the same building, the year the householder moved into the present housing unit was to be reported. The intent is to establish the year the present occupancy by the householder began. The year the householder moves is not necessarily the same year other members of the household move, although in the great majority of cases, the entire household moves at the same time.

Prior to 1980, data on year moved into unit was collected for the head of household. For an explanation, see the definition of householder on page App-13.

Vacant housing units—A housing unit is vacant if no one is living in it at the time of the interview, unless its occupants are only temporarily absent. In addition, a vacant unit may be one which is occupied entirely by persons who have a usual residence elsewhere.

New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if the roof, walls, windows, or doors no longer protect the interior from the elements, if the unit is severely damaged by fire, or if there is positive evidence (such as a sign on the house or block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store or an office; or quarters used for the storage of business supplies or inventory, machinery, or agricultural products.

The concepts and definitions of vacant housing units used in this report are the same as those used in the 1970 Census of Housing reports.

Vacancy status—Vacant housing units are classified as either "seasonal and migratory" or "year-round." "Seasonal" units are intended for occupancy during only certain seasons of the year. Included are units intended for recreational use, such as beach cottages and hunting cabins, and vacant units held for herders and loggers. "Migratory" units are vacant units held for occupancy by migratory labor employed in farm work during the crop season.

"Year-round" vacant housing units are available or intended for occupancy at any time of the year. A unit in a resort area which is usually occupied on a year-round basis is considered year-round. A unit used only occasionally throughout the year is also considered year-round.

"Year-round" vacant units are subdivided as follows:

For sale only—Vacant year-round units "for sale only" also include vacant units in a cooperative or condominium project if the individual units are offered for sale only.

For rent—Vacant year-round units "for rent" also include vacant units offered either for rent or for sale.

Rented or sold, not occupied—If any money rent has been paid or agreed upon but the new renter has not moved in as of the date of the interview, or if the unit has recently been sold but the new owner has not yet moved in, the year-round vacant unit is classified as "rented or sold, not occupied."

Held off market—A housing unit which is neither for sale nor for rent, or rented or sold not occupied, is classified as held off market. Included are units held for occasional use, units temporarily occupied by persons with a usual residence elsewhere, and other vacants.

Held for occasional use—This category consists of vacant year-round units which are held for weekend or other occasional use throughout the year. The intent of this question was to identify homes reserved by their owners as second homes. Because of the difficulty of distinguishing between this category and seasonal vacancies, it is possible that some "second homes" are classified as "seasonal" and vice versa.

Temporarily occupied by URE (persons with usual residence elsewhere)—If all the persons in a housing unit usually live elsewhere, that unit is classified as vacant, provided the usual place of residence is held for the household and is not offered for rent or for sale. For example, a beach cottage occupied at the time of the interview by a family who has a usual place of residence in the city is included in the count of vacant units. If the house in the city were in the survey sample, it would be reported "occupied" and would be included in the count of occupied units since the occupants are only temporarily absent.

Other vacant—If a vacant year-round unit does not fall into any of the classifications specified in the distribution, it is classified as "other vacant." For example, this category includes units held for settlement of an estate, units held for occupancy by a caretaker or janitor, and units held for personal reasons of the owner. If separate distributions are not presented for "held for occasional use" or "temporarily occupied by URE" housing units, these categories are also included.

Characteristics of vacant housing are limited to year-round vacant units. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain reliable information for them. However, counts of seasonal units are given in parts A and E of this report series.

The 1974 through 1980 counts for "seasonal and migratory," "year-round, rented or sold not occupied," "year-round, held for occasional use," and "year-round, other-vacant" may not be comparable to the corresponding counts shown in the 1973 reports, because a more detailed estimation procedure was used in the 1974 through 1980 tabulations. For 1974 through 1980, the estimation procedure adjusted the survey counts of "vacant year-round" and "vacant—seasonal and migratory" units separately to independent current estimates.

(See section on "Estimation" in Appendix B—Source and Reliability of the Estimates.) In 1973, "vacant—seasonal and migratory" units were combined with several categories of year-round vacancies (rented or sold, not occupied; held for occasional use; and other vacant) and were adjusted to the combined total of the independent estimates for these categories. Thus, the 1974 through 1980 data for vacant units adhere more closely to the independent estimates than the 1973 data.

Homeowner vacancy rate—The 1980 homeowner vacancy rate is the number of year-round vacant units for sale as a percent of the total homeowner inventory; i.e., all owner-occupied units and year-round vacant units for sale or sold, not occupied. The homeowner vacancy rate for 1970 excludes vacant units sold but not occupied.

Rental vacancy rate—The 1980 rental vacancy rate is the number of year-round vacant units for rent as a percent of the total rental inventory; i.e., all renter-occupied units and all year-round vacant units for rent or rented, not occupied. The rental vacancy rate for 1970 excludes vacant units rented but not occupied.

Duration of vacancy—The statistics on duration of vacancy refer to the length of time (in months) from the date the last occupants moved from the unit to the date of the interview. The data, therefore, do not provide a direct measure of the total length of time units remain vacant. For newly constructed units which have never been occupied, the duration of vacancy is counted from the date construction was completed. For recently converted or merged units, the time is reported from the date conversion or merger was completed. Units occupied entirely by persons with usual place of residence elsewhere are excluded from the data.

Housing unit boarded up—Statistics for this item are only provided for vacant housing units. "Boarded up" refers to the covering of windows and doors by wood, metal, or similar materials to prevent entry into the housing unit. A 1-unit structure or a given housing unit in a multiunit structure may be boarded up. This item was collected by interviewer observation.

Utilization Characteristics

Persons—All persons occupying the housing unit are counted. These persons include not only occupants related to the householder but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the householder. (Prior to 1980, head of household was used, see definition of householder on page App.13.) The data on "persons" show categories of the number of one-person through seven-or-more-person households by the number of housing units.

A person is counted at the usual place of residence for that person. This refers to the place where the person lives and sleeps most of the time. This place is not necessarily the same as a legal residence, voting residence, or domicile.

Rooms—The statistics on "rooms" are for the number of housing units with specified number of rooms. Rooms counted include whole rooms used for living purposes, such as living rooms, dining rooms, bedrooms, kitchens, finished attic or basement rooms, recreation rooms, permanently enclosed porches that are suitable for year-round use, and lodger's rooms. Also included are rooms used for offices by a person living in the unit.

A partially divided room, such as a dinette next to a kitchen or living room, is a separate room only if there is a partition from floor to ceiling, but not if the partition consists only of shelves or cabinets.

Not included in the count of rooms are bathrooms, halls, foyers or vestibules, balconies, closets, alcoves, pantries, strip or pullman kitchens, laundry or furnace rooms, unfinished attics or basements, other unfinished space used for storage, open porches, trailers used only as bedrooms, and offices used only by persons not living in the unit.

If a room is used by occupants of more than one unit, the room is included with the unit from which it is most easily reached.

Persons per room—"Persons per room" is computed for each occupied housing unit by dividing the number of persons in the unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of housing units having the specified ratio of persons per room.

Bedrooms—The number of bedrooms in a housing unit is the count of rooms used mainly for sleeping, even if also used for other purposes. Rooms reserved for sleeping, such as guest rooms, even though used infrequently, are counted as bedrooms. On the other hand, rooms used mainly for other purposes, even though used also for sleeping, such as a living room with a hideaway bed, are not considered bedrooms. A housing unit consisting of only one room, such as a one-room efficiency apartment, is classified by definition as having no bedroom.

Structural Characteristics

Conventional housing units—Housing units not defined as mobile homes or trailers by this survey are classified as conventional.

Complete kitchen facilities—A unit has complete kitchen facilities when it has all three of the following for the exclusive use of the occupants of the unit: (1) An installed sink with piped water, (2) a range or cookstove, and (3) a mechanical refrigerator. All kitchen facilities must be located in the structure. They need not be in the same room. Quarters with only portable cooking equipment are not considered as having a range or cookstove. An icebox is not included as a mechanical refrigerator.

The kitchen facilities are for the exclusive use of the occupants when they are used only by the occupants of one housing unit, including lodgers or other unrelated persons living in the unit. When a structure consists of only one housing unit,

all equipment located inside the structure is classified, by definition, for exclusive use.

For vacant units from which one or all of the kitchen facilities had been removed, the kitchen facilities used by the last occupant were to be reported.

Year structure built—"Year structure built" refers to when the building was first constructed, not when it was remodeled, added to, or converted. The figures refer to the number of units in structures built during the specified periods and in existence at the time of the interview. For mobile homes and trailers, the manufacturer's model year was assumed to be the year built. Statistics are based on the respondent's estimate and are, therefore, subject to the respondent's ability to properly classify the year built for the building.

Units in structure—In determining the number of housing units in a structure, all units, both occupied and vacant, were counted. The statistics are presented for the number of housing units in structures of specified type and size, not by the number of residential structures.

A structure is a separate building if it has either open space on all sides or is separated from other structures by dividing walls that extend from ground to roof. Structures containing only one housing unit are further classified as detached or attached.

A 1-unit structure is detached if it has open space on all four sides even though it has an adjoining shed or garage. A 1-unit structure is attached if it has one or more walls extending from ground to roof which divide it from other adjoining structures, such as in row houses, townhouses, etc.

Mobile homes and trailers are shown as a separate category. When one or more rooms have been added to a mobile home or trailer, it is classified as a 1-unit structure. If, however, only a porch or shed has been added, it is still counted as a mobile home or trailer.

Elevator in structure—Statistics on "elevator in structure" are for the number of housing units in structures with four floors or more which have a passenger elevator. Units are in a "walkup" structure of four floors or more if the structure has no passenger elevator or if the only elevator service is for freight.

In group of 6 or more mobile homes—Mobile homes and trailers that are gathered close together are considered to be in a "group." This may be a large mobile home park containing many units or it may be a small number grouped together on a single site or adjacent sites.

Interior walls and ceilings—Statistics are presented on whether or not there are open cracks or holes and broken plaster or peeling paint on the interior walls or ceilings of a housing unit. Included are cracks or holes that do not go all the way through to the next room or to the outdoors. Hairline cracks or cracks that appear in the walls or ceilings but are not large enough for a fingernail file to be inserted and very small holes caused by nails or other similar objects are not considered to be open cracks or holes.

Broken plaster or peeling paint must be on the inside walls or ceilings, and at least one area of the broken plaster or peeling paint must be approximately one square foot or larger.

Interior floors—Data are shown on whether there are holes in the interior floors of a housing unit. The holes do not have to go through the floor. Excluded are very small holes caused by nails or other similar objects.

Abandoned or boarded-up buildings on same street—Statistics on abandoned or boarded-up buildings on the same street are based on the interviewer's observation from the main entrance of the building in which the sample unit is located. Buildings are classified as abandoned or boarded up if they are permanently vacant and show severe signs of neglect, have most of their visible windows broken or missing, or have their windows and doors covered by wood, metal, or some other similar material to prevent entry.

Plumbing Characteristics

Plumbing facilities—The category "with all plumbing facilities" consists of housing units which have hot and cold piped water inside the structure as well as a flush toilet and a bathtub or shower inside the structure for the exclusive use of the occupants of the housing unit. All plumbing facilities must be located in the structure but they need not be in the same room. "Lacking some or all plumbing facilities" means that the unit does not have all three specified plumbing facilities (hot and cold piped water, flush toilet, and bathtub or shower) inside the structure, or that the toilet or bathing facilities are also for the use of the occupants of other housing units.

Complete bathrooms—A housing unit is classified as having a complete bathroom if it has a room with a flush toilet and bathtub or shower and a washbasin, as well as piped hot water in the structure for the exclusive use of the occupants of the unit. A half bathroom has either a flush toilet or a bathtub or shower for exclusive use, but does not have all the facilities for a complete bathroom.

The category "also used by another household" consists of units with bathroom facilities which are also for the use of the occupants of other housing units.

The category "none" consists of units with no bathroom facilities, units with only a half bathroom, and units with all bathroom facilities but not in one room.

Source of water or water supply—"A public system or private company" refers to a common source supplying running water to six or more housing units. The water may be supplied by a city, county, water district, or private water company, or it may be obtained from a well which supplies six or more housing units. If a well provides water for five or fewer housing units, it is classified as an "individual well." Water sources such as springs, creeks, rivers, cisterns, ponds, or lakes are included in the "other" category.

Sewage disposal—A "public sewer" is connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. It may be operated by a governmental body or private organization. A "septic tank or cesspool" is an underground tank or pit used for disposal of sewage. Small sewage treatment plants, which in some localities are called neighborhood septic tanks, are classified as public sewers. Units for which sewage is disposed of in some other way are included in the "other" category.

Equipment and Fuels

Telephone available—A housing unit is classified as having a telephone if there is one available to the occupants of the unit for receiving calls. The telephone may be located outside or inside the housing unit, and one telephone may serve the occupants of several units. The number of housing units with a telephone available, therefore, does not indicate the number of telephones installed in homes.

Heating equipment—"Warm-air furnace" refers to a central system which provides warm air through ducts leading to various rooms. A "heat pump" refers to an electric all-in-one heating-cooling system which utilizes indoor and outdoor coils, a refrigerant, and a compressor to provide heating in the winter and cooling in the summer. Only heat pumps that are centrally installed with ducts to the rooms are included in this category. "Steam or hot water" refers to a central heating system in which heat from steam or hot water is delivered through radiators or other outlets. "Built-in electric units" are permanently installed in floors, walls, ceilings, or baseboards. A "floor, wall, or pipeless furnace" delivers warm air to the room right above the furnace or to the room(s) on one or both sides of the wall in which the furnace is installed.

"Room heaters with flue" include circulating heaters, convectors, radiant gas heaters, and other nonportable heaters that burn gas, oil, kerosene, or other liquid fuels, and connect to a flue, vent, or chimney to remove smoke and fumes. "Room heaters without flue" include any room heater (not portable) that burns gas, oil, or kerosene and does not connect to a flue, vent, or chimney. "Fireplaces, stoves, or portable heaters" include room heaters that burn coal, coke, charcoal, wood or other solids. It also includes portable room heaters that burn kerosene, gasoline, fuel oil, or other liquid fuel, as well as portable electric heaters that get current from an electrical wall outlet.

For vacant units from which the heating equipment had been removed, the equipment used by the last occupants was to be reported.

Air conditioning—Air conditioning is defined as the cooling of air by a refrigeration unit; excluded are evaporative coolers, fans, or blowers which are not connected to a refrigeration unit. A room unit is an individual air conditioner which is installed in a window or an outside wall and is generally intended to cool one room, although it may sometimes be used to cool more than one room. A central system is a central installation which

air-conditions the entire housing unit. In an apartment building, a central system may cool all apartments in the building; each apartment may have its own central system; or there may be several systems, each providing central air conditioning for a group of apartments. A central installation with individual room controls is a central air-conditioning system.

House heating fuel—"Utility gas" is gas piped through underground pipes from a central system to serve the neighborhood. "Bottled, tank, or LP gas" is stored in tanks which are refilled or exchanged when empty. "Kerosene, etc." includes kerosene, gasoline, alcohol, and other combustible liquids. "Other fuel" includes any other fuel such as solar heat, briquettes made of pitch and sawdust, corncobs, or purchased steam.

Financial Characteristics

Value—Value is the respondent's estimate of how much the property (house and lot) would sell for if it were for sale. The statistics on value are shown only for 1-unit structures on less than 10 acres having no commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, mobile homes, and trailers are excluded from the value tabulations.

Value-income ratio—The value-income ratio is computed by dividing the value of the housing unit by the total money income of the family or primary individual. The data are presented for the same owner-occupied units for which "value" was tabulated (see "Value" for exclusions). The ratio was computed separately for each unit and was rounded to the nearest tenth. In reporting value, respondents were asked to select an appropriate class interval. The midpoints of the value intervals were used in the computation of the value-income ratio, except that a mean of \$3,500 was assigned for values less than \$5,000 and a mean of \$325,000 was assigned for values of \$300,000 or more. For income, the dollar amounts were used. Units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

The 1980 income statistics are for the 12 months prior to the date of the interview. For 1970, the income statistics cover the calendar year 1969.

Sales price asked—For vacant housing units, the sales price is the amount asked for the property at the time of the interview and may differ from the price at which the property is sold. The statistics on sales price asked are shown only for vacant for sale 1-unit structures on less than 10 acres having no commercial establishment or medical or dental office on the property.

Garage or carport on property—The garage or carport must be currently available for use by the occupants of the housing unit; i.e., members of the household can use it for parking even if it is currently used as a storage area for items such as lawn equipment or furniture. It may be attached to the house or it may be completely unattached, but it must be on the property.

Excluded are garages or carports that have been converted to other uses such as living quarters, an area used for business purposes, an area rented to someone else, or for some reason cannot be used for parking.

Mortgage—The data are restricted to owner-occupied, 1-unit structures on less than 10 acres having no commercial establishment or medical or dental office on the property. The data exclude owner-occupied cooperative and condominium units. A mortgage refers to all forms of debt where the property is pledged as security for payment of the debt. It includes such debt instruments as deeds of trust, trust deeds, mortgage bonds, and vendor liens. In the first three arrangements, usually a third party, known as the trustee, holds the title to the property until the debt is paid. In the vendor lien arrangement, the title is kept by the buyer but the seller (vendor) reserves, in the deed to the buyer, a lien on the property to secure payment of the balance of the purchase price. Also included as a mortgage are contracts to purchase, land contracts, and lease-purchase agreements where the title to the property remains with the seller until the agreed upon payments have been made by the buyer.

Housing units which are owned free and clear comprise the category "units with no mortgage." Also included in this category are housing units in which the owner has no mortgage but pays a "ground rent"; that is, the occupant owns the unit but leases, rents, or pays a fee for the use of the land.

Installment loan or contract—The data are limited to owner-occupied mobile homes and trailers on less than 10 acres. Mobile homes and trailers where payments are being made towards their purchase comprise the category, "with installment loan or contract."

Monthly mortgage payment—The data are limited to owner-occupied, 1-unit structures on less than 10 acres having no commercial establishment or medical or dental office on the property. The data present the monthly dollar amount paid for the mortgage, principal and interest only. Real estate taxes and fire and hazard insurance costs are excluded from the data even if they are included in the regular payment to the lender.

Real estate taxes last year—The data are restricted to owner-occupied, 1-unit structures on less than 10 acres having no commercial establishment or medical or dental office on the property. The data exclude owner-occupied cooperatives, condominiums, mobile homes, and trailers. "Real estate taxes last year" refers to the yearly total amount of all real estate taxes payable on the entire property during the last billing period. It includes State and local real estate taxes. Not included are payments on delinquent taxes due from prior years or payments for special assessments, facilities, or services. When the real estate taxes are included with the mortgage, a separate amount for the taxes is obtained.

In part C, the mean real estate taxes for last year per \$1,000 value of the property (house and lot) are presented. Housing units for which no taxes are paid are excluded from the computation of the mean.

Property insurance—This refers to fire and hazard insurance; that is, policies which protect the unit and its contents against loss due to damage by fire, lightning, wind, hail, explosion, etc. Homeowners' policies are also included since this type of insurance has fire and hazard insurance together with other types of homeowner protection such as liability. If the cost of the insurance was included as part of the mortgage payments, a separate amount for the insurance was obtained. The amount of the insurance premium reported was the amount paid for an entire 12-month period even if made in two or more installments. Property insurance is shown only as a component of "Selected monthly housing costs" and "Selected monthly housing costs as percentage of income." The data are presented separately for owner-occupied, 1-unit structures on less than 10 acres with no commercial establishment or medical or dental office on the property and for owner-occupied mobile homes and trailers on less than 10 acres. The data exclude owner-occupied cooperative and condominium units.

Selected monthly housing costs—The data are presented separately for owner-occupied, 1-unit structures on less than 10 acres having no commercial establishment or medical or dental office on the property and for owner-occupied mobile homes and trailers on less than 10 acres. The data exclude owner-occupied cooperative and condominium units. Separate distributions are shown by whether or not there is a mortgage or, for mobile homes and trailers, by whether or not there is an installment loan or contract. Selected monthly housing costs is the monthly sum of payments for the mortgage, or installment loan or contract, real estate taxes (including taxes on mobile home or trailer site if the site is owned), property insurance, utilities (electricity, gas, water, and sewage disposal), fuel (oil, coal, kerosene, wood, etc.), and garbage and trash collection.

Households with a mortgage or similar debt that failed to report the amount of their payment and/or those households that did not report their real estate taxes are included in the "not reported" category. Likewise, for mobile homes and trailers, households that had an installment loan or contract but did not report their loan payment and/or their taxes are also included in the "not reported" category.

Selected monthly housing costs as percentage of income—The yearly housing costs (selected monthly housing costs multiplied by 12) are expressed as a percentage of the total income of the family, or primary individual. This percentage is presented for the same owner-occupied units for which "selected monthly housing costs" were tabulated (for exclusions, see "Selected monthly housing costs"). The percentage was computed separately for each unit and was rounded to the nearest tenth of a percent. For income and "selected monthly housing costs," the dollar amounts were used. Units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

Households that did not report the amount of, or did not pay mortgage or similar debt and/or real estate taxes were included in the "not reported" category.

Purchase price of mobile home—This item refers to owner-occupied mobile homes and trailers on less than 10 acres. The purchase price is the total cost of the mobile home or trailer at the time of purchase including the downpayment but excluding site costs or closing costs. The "not purchased" category refers to mobile homes and trailers that were not purchased by any occupant of the unit; e.g., if the unit was acquired as a gift.

Year mobile home acquired—This item pertains to owner-occupied mobile homes and trailers on less than 10 acres. "Year acquired" is the calendar year that the current owner took possession of the mobile home or trailer, not the year the mobile home or trailer was manufactured. "Acquired" includes purchase as well as other forms of taking possession such as inheritance, gift, trade, and foreclosure.

Mobile home acquired new—The data pertain to owner-occupied mobile homes and trailers on less than 10 acres. "Acquired new" means that no other person or family lived in the mobile home or used it for a business, etc., before the present owner acquired it.

Contract rent—Contract rent is the monthly rent agreed to, or contracted for, even if the furnishings, utilities, or services are included. The statistics on rent exclude 1-unit structures on 10 acres or more. Rent data for mobile homes and trailers are not restricted by acreage. Renter units occupied without payment of cash rent are shown separately as "no cash rent" in the rent tabulations.

Gross rent—The computed rent, termed "gross rent," is the contract rent plus the estimated average monthly cost of utilities (electricity, gas, water) and fuels (oil, coal, kerosene, wood, etc.) if these items are paid for by the renter (or paid for by someone else, such as a relative, welfare agency, or friend) in addition to rent. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Thus, gross rent is intended to eliminate differentials which result from varying practices in the inclusion of utilities and fuel as part of the rental payment. The estimated costs of water and fuels are reported on a yearly basis, but they are converted to monthly figures in the computation process.

The statistics on rent exclude 1-unit structures on 10 acres or more. Rent data for mobile homes and trailers are not restricted by acreage. Renter units occupied without payment of cash rent are shown separately as "no cash rent" in the rent tabulations.

Gross rent in nonsubsidized housing—The gross rent for nonsubsidized housing units excludes units reported in public housing projects, units with Federal, State, or local government rent subsidies, as well as 1-unit structures on 10 acres or more. In this report, data on nonsubsidized units are not based on government or local records; the figures are, therefore, subject to the ability of a respondent to properly classify the unit as subsidized or nonsubsidized housing.

Gross rent as percentage of income—The yearly gross rent (monthly gross rent multiplied by 12) is expressed as a

percentage of the total income of the family or primary individual. The percentage is presented for the same renter-occupied units for which gross rent is tabulated; thus, the statistics on gross rent as percentage of income reflect the exclusion of certain renter-occupied housing units. The percentage is computed separately for each unit and is rounded to the nearest whole number. For gross rent and income, the dollar amounts are used in the computation. Units for which no cash rent is paid and units occupied by families or primary individuals who report no income or a net loss comprise the category "not computed."

The 1980 income statistics are for the 12 months prior to the date of the interview. For 1970, the income statistics cover the calendar year 1969.

Gross rent in nonsubsidized housing as percentage of income—This item is computed in the same manner as "gross rent as percentage of income" except that rents and incomes for public and subsidized housing units are excluded. Data on nonsubsidized units in this report are not based on government or local records; they are, therefore, subject to the ability of a respondent to properly classify the unit as subsidized or nonsubsidized housing.

Inclusion in rent (garbage and trash collection and furniture)—Counts are shown separately for units in which garbage and trash collection and furniture are included in the rent. The data are restricted to renter-occupied units for which cash rent is paid and exclude 1-unit structures on 10 acres or more.

Garbage and trash collection—Included are units which have garbage and trash collection service available in connection with the building. The service may be public or private and must be available without additional cost to the renter. If the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, the data refer to the garbage collection service. In tables 3, 6, and 9 of part C separate counts are also shown for renter-occupied units reporting additional amounts paid for garbage and trash collection service.

Furniture—The statistics refer to furnished apartments or houses in which the management supplied major pieces of furniture such as a bed, sofa, chest of drawers, and table and chairs for the use of the occupant. Refrigerator, cooking range or stove, lamps, and rugs are not considered furniture. Housing units in which the occupants rent furniture from some source other than the management are not classified as furnished.

Rent asked—For vacant units, the rent is the amount asked for the housing unit at the time of the interview and may differ from the rent contracted for when the unit was occupied. The data are for vacant, year-round housing units for rent, excluding 1-unit structures on 10 acres or more. The median rent asked is shown separately for units in which the rent includes payment for utilities (electricity, gas, and water) and fuels (oil, coal, kerosene, wood, etc.). Median rent asked is also shown for units in which the rent includes payment for utilities and fuels, as well as garbage and trash collection service.

Public, private, or subsidized housing—A housing unit is classified as being in a "public housing project" if the structure in which the unit is located is owned by a local housing authority or other public agency, such as a housing and redevelopment authority or a housing development agency, and operated as public housing. These organizations may receive subsidies from the Federal or State government but the local agency owns the property. All other housing units are classified as "private housing."

Private housing units are further classified by whether the unit is subsidized; that is, the respondent pays a lower rent because a Federal, State, or local government program pays part of the cost of construction, building mortgage, or operating expenses. These programs include (1) the interest subsidy programs of the Department of Housing and Urban Development (HUD) for rental and cooperative housing for moderate-income families, (2) the rent supplement program where part of the rent for low-income families occupying certain types of rental housing projects is paid by HUD, and (3) the direct loan program of HUD for housing the elderly.

The statistics on public or subsidized housing exclude 1-unit structures on 10 acres or more and renter units occupied without payment of cash rent. In addition, the data are not based on government or local records; the figures are, therefore, subject to the ability of a respondent to properly classify the unit as public or private and, if private, as subsidized or nonsubsidized housing.

Household Characteristics

Household—A household consists of all the persons who occupy a housing unit. By definition, the count of households is the same as the count of occupied housing units.

Householder—The householder is the first household member 18 years old or over who is the owner or renter of the sample unit. If no household member occupying the sample unit owns or rents the unit, the householder is the first household member listed who is 18 years old or older. In all the previous AHS reports (1973 to 1979) the concept "head" of household was used. One person in each household was designated as the head, that is the person who was regarded as the head by the respondent. However, if a married woman living with her husband was reported as the head, her husband was considered the head for the purpose of simplifying the tabulations.

Household composition by age of householder—Statistics by age of householder are presented separately for two-or-more-person households and for one-person households. Households having two or more persons are further subdivided as follows:

Married couple families, no nonrelatives—Each household in this group consists of the householder and spouse, and other persons, if any, all of whom are related to the householder.

Other male householder—This category includes households with male householders who are married, but with wife absent because of separation or other reason where husband and wife maintain separate residences; and male householders

who are widowed, divorced, or single. Also included are households with male householder, wife present and nonrelatives living with them.

Other female householder—This category includes households with female householders who are married, but with husband absent because of separation or other reason where husband and wife maintain separate residences; and female householders who are widowed, divorced, or single. Also included are households with female householder, husband present and nonrelatives living with them.

Households consisting of only one person are shown separately for male head and female head under the category "one-person households."

Family or primary individual—Housing units are occupied by either "families" or "primary individuals." The term "family" refers to the householder and all (one or more) other persons living in the same household who are related to the householder by blood, marriage, or adoption. If the householder lives alone or with nonrelatives only, then the householder is considered a "primary individual."

Married couples related to the householder of a family are included in the family and are not considered as separate families. A lodger, servant, or other persons unrelated to the householder is considered a member of the household but not of the family.

In the statistics on household composition, families are always included in one of the three major groups of two-or-more-person households. Primary individuals with nonrelatives living with them are tabulated as other male or female householder. Primary individuals living alone are always tabulated as one-person households.

Subfamily—A subfamily is a married couple with or without children, or one parent with one or more own single (never married) children under 18 years old, living in a household and related to, but not including the householder or spouse. The most common example of a subfamily is a young married couple sharing the home of the husband's or wife's parents.

Age of householder—The age classification refers to the age reported for the householder as of that person's last birthday.

Persons 65 years old and over—All persons, including the householder, who are members of the household and are 65 years old and over, are included in the count of persons 65 years old and over.

Own children—Statistics on presence of "own" children of householder, are shown in this report. A child under 18 years old is defined as an "own" child if he or she is a single (never married) son, daughter, stepchild, or adopted child of a householder. Own children of subfamilies are excluded from the total count of own children.

Other relative of householder—This category includes all persons related to the householder by blood, marriage, or adoption except wife, husband, or child of householder and members of subfamilies.

Nonrelative—A nonrelative of the householder is any person in the household who is not related to the householder by blood, marriage, or adoption. Roomers, boarders, lodgers, partners, resident employees, wards, and foster children are included in this category.

Years of school completed by householder—The statistics refer to the highest grade of regular school completed and not to the highest grade attended. For persons still attending school, the highest grade completed is one less than the one in which they are currently enrolled. Regular school refers to formal education obtained in graded public, private, or parochial schools, colleges, universities, or professional schools, whether day or night school, and whether attendance was full or part time. That is, "regular schooling" is formal education which may advance a person toward an elementary or high school diploma, or college, university, or professional school degree. Schooling or tutoring in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system. Householders whose highest grade completed was in a foreign school system or in an ungraded school were instructed to report the approximate equivalent grade (or years) in the regular United States school system. They were not reported as having completed a given grade if they dropped out or failed to pass the last grade attended. Education received in the following types of schools is not counted as "regular schooling." Vocational schools, trade schools, business schools, and noncredit adult education classes.

Income—The statistics on income in the Annual Housing Survey are based on the respondent's reply to questions on income for the 12 months prior to the interview and are the sum of the amounts reported for wage and salary income, net self-employment income, Social Security or railroad retirement income, public assistance or welfare payments, and all other money income. The figures represent the amount of income received before deductions for personal income taxes, Social Security, union dues, bond purchases, health insurance premiums, Medicare deductions, etc.

In this report series, the statistics relate to the money income of the family or primary individual occupying the housing unit, i.e., the sum of the income of the householder of the family and all other members of the family 14 years old and over, or the income of the primary individual. Incomes of persons living in the unit but not related to the householder are not included in this sum.

Wage or salary income is defined as the total money earnings received for work performed as an employee at any time during the 12-month period prior to the interview. It includes wages, salaries, piece-rate payments, commissions, tips, cash bonuses, and Armed Forces pay. Net self-employment income is defined as net money income (gross receipts minus operating expenses) received from a business, professional practice, partnership, or farm in which the person was self-employed.

Social Security or railroad retirement income includes cash receipts of Social Security pensions; survivors' benefits; disability insurance programs for retired persons, dependents of deceased insured workers, or disabled workers; and deductions

for Medicare and health insurance premiums. Cash receipt of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included. Separate payments received for hospital or other medical care are not included.

Income from all other sources includes money income received from sources such as periodic payments from estates and trust funds; dividends; interest; net rental income (or loss) from property rentals; net receipts from roomers or boarders; net royalties; public assistance or welfare payments which include cash receipts received from public assistance programs, such as old age assistance, aid to families with dependent children, and aid to the blind or totally disabled; unemployment insurance benefits; money received for transportation and/or subsistence by persons participating in special governmental training programs, such as the Area Redevelopment Act and the Manpower Development and Training Act; workmen's compensation cash benefits; periodic payments by the Veterans' Administration to disabled members of the Armed Forces or to survivors of deceased veterans; public or private pensions; periodic receipts from insurance policies or annuities; alimony or child support from persons who are not members of the household; net gambling gains; and nonservice scholarships and fellowships.

Receipts from the following sources were not included as income: Value of income "in kind," such as free living quarters, housing subsidies, food stamps, or food produced and consumed in the home; money received from the sale of property (unless the recipient was engaged in the business of selling such property); money borrowed; tax refund; withdrawal of bank

deposits; accrued interest on "uncashed" savings bonds; exchange of money between relatives living in the same household; and gifts and lump-sum insurance payments, inheritances, and other types of lump-sum receipts.

The income statistics and the characteristics of the household refer to different periods in time. For 1980, the income data refer to the 12 months prior to the interview, and the household characteristics refer to the date of the interview. For 1970, income data refer to the calendar year 1969, but the household characteristics refer to April 1, 1970. Thus, family income does not include amounts received by persons who were members of the family during all or part of the income period if these persons no longer resided with the family at the time of the interview. On the other hand, family income includes amounts reported by related persons who did not reside with the family during the entire income period but who were members of the family at the time of the interview. For most families, however, the income reported was received by persons who were members of the family throughout the income period.

There may be significant differences in the income data between the Annual Housing Survey and other Bureau of the Census' surveys and censuses. For example, the time period for income data in the Annual Housing Survey refers to the 12 months prior to the interview while other income data generally refer to the calendar year prior to the date of the interview. Additional differences in the income data may be attributed to the various ways income questions are asked, the sampling variability and nonsampling errors between the Annual Housing Survey and other Bureau surveys and censuses, survey procedures and techniques, and processing procedures.

CHECK ITEM A		CHECK ITEM B	
REGULAR OR URE AND: (See item 8, page 1)		VACANT OR URE AND: (See item 8, page 1)	
1a. Since (last year's interview date), has there been a change in the number of rooms in this house (apartment)?	<input type="checkbox"/> 1 Yes — Ask b <input type="checkbox"/> 2 No <input type="checkbox"/> 3 Don't know — Ask b	<input type="checkbox"/> Same household interviewed last enumeration period (at least one entry in '79' year column of item 14 on the current Control Card) — Ask questions in Column A <input type="checkbox"/> All others — Ask questions in Column B	1b. How many rooms are (now) in this house (apartment)? Do not count bathrooms, porches, balconies, foyers, halls, or half-rooms. (021) _____ Number of rooms
2a. Since (last year's interview date), has there been a change in the number of bedrooms in this house (apartment)?	<input type="checkbox"/> 1 Yes — Ask b <input type="checkbox"/> 2 No <input type="checkbox"/> 3 Don't know — Ask b	<input type="checkbox"/> Vacant last enumeration period — Ask questions in Column A <input type="checkbox"/> All others — Ask questions in Column B	2b. How many bedrooms are (now) in this house (apartment)? Count rooms used mainly for sleeping even if used for other purposes. (022) _____ Number of bedrooms OR 0 None
3a. Since (last year's interview date), have any kitchen facilities been added or eliminated in this house (building)?	<input type="checkbox"/> 1 Yes — Ask b <input type="checkbox"/> 2 No <input type="checkbox"/> 3 Don't know — Ask b		3b. Does this house (building) (now) have complete kitchen facilities: that is, a kitchen sink with piped water, a refrigerator and a range or a cooktop which are available for your use (the use of the intended occupants)? (023) <input type="checkbox"/> Yes — For this household only <input type="checkbox"/> 2 Yes — Also used by another household <input type="checkbox"/> 3 No
4a. Since (last year's interview date), has there been a change in the source of water for this house (building)?	<input type="checkbox"/> 1 Yes — Ask b <input type="checkbox"/> 2 No <input type="checkbox"/> 3 Don't know — Ask b		4b. Does the water for this house (apartment) (now) come from a public or private system; an individual well; or some other source such as a spring, creek, river, cistern, etc.? (024) <input type="checkbox"/> A public system or private company <input type="checkbox"/> 2 An individual well <input type="checkbox"/> 3 Some other source — Specify below

CHECK ITEM C		CHECK ITEM D	
REGULAR OR URE AND: (See item 8, page 1)		VACANT OR URE AND: (See item 8, page 1)	
5a. Since (last year's interview date), has there been a change in the means of sewage disposal for this house (building)?	<input type="checkbox"/> 1 Yes — Ask b <input type="checkbox"/> 2 No <input type="checkbox"/> 3 Don't know — Ask b	<input type="checkbox"/> Vacant unit — Skip to 7a	5b. What means of sewage disposal does this house (building) (now) have? (025) <input type="checkbox"/> Public sewer <input type="checkbox"/> 2 Septic tank or cesspool <input type="checkbox"/> 3 Chemical toilet <input type="checkbox"/> 4 Privy <input type="checkbox"/> 5 Use facilities in another structure <input type="checkbox"/> 6 Other — Specify
6a. Since (last year's interview date), has there been a change in the type of fuel used to heat this house (apartment)?	<input type="checkbox"/> 1 Yes — Ask b <input type="checkbox"/> 2 No <input type="checkbox"/> 3 Don't know — Ask b	<input type="checkbox"/> Vacant unit — Skip to 7b	6b. How is this house (apartment) (now) heated — by gas, oil, electricity, or with some other fuel? (026) <input type="checkbox"/> Gas, <input type="checkbox"/> 1 From underground pipes serving the neighborhood <input type="checkbox"/> 2 Bottled, tank, or LP <input type="checkbox"/> 3 Fuel oil <input type="checkbox"/> 4 Kerosene, etc. <input type="checkbox"/> 5 Electricity <input type="checkbox"/> 6 Coal or coke <input type="checkbox"/> 7 Wood <input type="checkbox"/> 8 Solar heat <input type="checkbox"/> 9 Other fuel <input type="checkbox"/> 0 No fuel used
7a. Since (last year's interview date), has a garage or carport been added or eliminated on this property?	<input type="checkbox"/> 1 Yes — Ask b <input type="checkbox"/> 2 No <input type="checkbox"/> 3 Don't know — Ask b	<input type="checkbox"/> Vacant unit — Skip to 7c	7b. Is there (now) a garage or carport on this property which is currently available for your use (the use of the intended occupants)? (027) <input type="checkbox"/> Yes <input type="checkbox"/> 2 No

 250,000 - 299,999
 300,000 or more

(See Check Item C, page 14)
 OWNED AS A CONDOMINIUM (Box 2 marked) - Skip to Check Item G, page 18
 All others - Skip to item 23

20. Do you own the mobile home (trailer) SITE or is it rented?
 Owned
 Rented or occupied without payment of cash rent

21a. In what year did you acquire this mobile home (trailer)?
 (17) 19 _____

b. Was the mobile home (trailer) NEW when you acquired it?
 Yes
 No

c. When you acquired this mobile home (trailer), what was the purchase price? Do not include price of site or closing costs.
 (18) \$ _____ Purchase price
 Not purchased

22. Do you have an installment loan or contract on this mobile home (trailer) or do you own it free and clear?
 Installment loan or contract - Skip to 24a
 Owned free and clear - Skip to 25a

23. Do you have a mortgage, deed of trust, or land contract on this property, that is house and lot, or do you own it free and clear?
 Mortgage, deed of trust, or land contract - Skip to 25a
 Owned free and clear - Skip to 25a

24a. In regard to the mortgage (loan), what are the required payments to the lender? If more than one mortgage (loan) on this property (mobile home or trailer), give total amount of payments.
 (13) \$ _____ PER _____
 Month
 Year
 Other - Specify _____

b. In regard to the mortgage (loan), do the required payments include -
 (1) Real estate taxes on this property? Yes No
 (2) Fire and hazard insurance? Yes No

NOTE - Ask all categories in 25a before asking 25b.

25a. (1) Do you pay for electricity?
 Yes
 No
 (2) Do you pay for gas?
 Yes
 No
 (3) Do you pay for oil, coal, kerosene, wood, OR any other fuel?
 Yes
 No, these fuels not used or obtained from _____
 (4) Do you pay for fire and hazard insurance? (Also include if part of mortgage payments.)
 Yes
 No
 (5) Do you pay for real estate taxes? (Also include if part of mortgage payments.)
 Yes
 No
 (6) Do you pay for water supply and/or sewage disposal?
 Yes
 No or payment included in real estate taxes
 (7) Do you pay for garbage (food waste) collection?
 Yes
 No or payment included in real estate taxes

25b. (1) In the past 12 months, what was the average MONTHLY cost for electricity?
 (13) \$ _____
 (2) In the past 12 months, what was the average MONTHLY cost for gas?
 (14) \$ _____
 (3) What is the YEARLY cost for oil, coal, kerosene, wood OR any other fuel?
 (15) \$ _____
 (4) What is the YEARLY cost for fire and hazard insurance?
 (16) \$ _____
 (5) What is the YEARLY cost for real estate taxes? (Do not include taxes in arrears from previous years.)
 (17) \$ _____
 (6) What is the YEARLY cost for water supply and sewage disposal?
 (18) \$ _____
 (7) What is the YEARLY cost for garbage (food waste) collection?
 (19) \$ _____ Skip to Check Item G, page 18

26. What is the MONTHLY rent?
 (Mark the frequency of payment box and enter the MONTHLY rent. (If rent is not paid by the month, compute the MONTHLY rent in "Notes" space and enter the monthly rent on the line provided.)
 (Do not include site rent for mobile homes if it is paid separately.)
 (20) \$ _____
 More frequently than once a month
 Less frequently than once a month
 Once a month

Facsimile of the Annual Housing Survey Questionnaire: 1980—Continued

Section IVB - OCCUPIED UNITS - Continued

NOTE - Ask 35a for all categories before asking 35b.

(Obtain income for reference person and all household members 15+ RELATED TO reference person by blood, marriage, or adoption.)

35a. In the past 12 months, did any member of this family (you) receive any money from -

(1) Social Security or Railroad Retirement payments?	184	1	Yes	2	No
(2) Estates, trusts or dividends?	186	1	Yes	2	No
(3) Interest on savings accounts or bonds?	188	1	Yes	2	No
(4) Net rental income?	189	1	Yes	2	No
(5) Welfare payments or other public assistance such as SSI?	192	1	Yes	2	No
(6) Unemployment compensation?	194	1	Yes	2	No
(7) Workmen's compensation?	196	1	Yes	2	No
(8) Government employee pensions?	198	1	Yes	2	No
(9) Veterans payments?	200	1	Yes	2	No
(10) Private pensions or annuities?	202	1	Yes	2	No
(11) Alimony or child support?	204	1	Yes	2	No
(12) Regular contributions from persons not living in this household?	206	1	Yes	2	No
(13) Anything else?	208	1	Yes	2	No

NOTE - Exclude income previously reported. Probe if an amount in item 35b is identical to an amount in item 33 or 34. Indicate that amounts are correct by marking this box .

(See Control Card item 11b and 11c)

CHECK ITEM 11

Household contains household members 15+ NOT RELATED TO THE REFERENCE PERSON by blood, marriage or adoption - Ask 36

All others - Skip to Check Item 1, page 22

Section IVB - OCCUPIED UNITS - Continued

36. In the past 12 months, how much did ... earn in wages, salaries, tips and commissions before taxes and deductions? _____
(Obtain income for household members 15+ NOT RELATED TO REFERENCE PERSON by blood, marriage, or adoption.)

37a. In the past 12 months, how much did ... earn in net income from his (her) own business, professional practice or partnership? _____
(Exclude income previously reported in items 34, 35, and 36. Probe if identical amounts are reported for an individual. Indicate that identical amounts are correct by marking this box .

b. In the past 12 months, how much did ... earn in net income from his (her) own farm or ranch? _____
(Exclude income previously reported in items 34, 35, 36, and 37a. Probe if identical amounts are reported for an individual. Indicate that identical amounts are correct by marking this box .

NOTE - Ask 38b for each "Yes" response in 38a. Ask 38a (and 38b as appropriate) for all categories before asking 38c.

38a. In the past 12 months, did ... (Names of household members 15+ NOT RELATED TO REFERENCE PERSON by blood, marriage or adoption) receive any money from -

(1) Social Security or Railroad Retirement payments?	210	1	Yes	2	No
(2) Estates, trusts or dividends?	211	1	Yes	2	No
(3) Interest on savings accounts or bonds?	212	1	Yes	2	No
(4) Net rental income?	213	1	Yes	2	No
(5) Welfare payments or other public assistance such as SSI?	214	1	Yes	2	No
(6) Unemployment compensation?	215	1	Yes	2	No
(7) Workmen's compensation?	216	1	Yes	2	No
(8) Government employee pensions?	217	1	Yes	2	No
(9) Veterans payments?	218	1	Yes	2	No
(10) Private pensions or annuities?	219	1	Yes	2	No
(11) Alimony or child support?	220	1	Yes	2	No
(12) Regular contributions from persons not living in this household?	221	1	Yes	2	No
(13) Anything else?	222	1	Yes	2	No

38b. Who received this type of income? _____
(Enter line numbers)

NOTES

Facsimile of the Annual Housing Survey Questionnaire: 1980—Continued

Section V - SUPPLEMENTAL ITEMS

(See Check Item C, page 14)

Owned or being bought - One-unit structure on less than 10 acres and there is no commercial establishment or medical or dental office on the property (box 4 marked) - Ask 39a

All others - Skip to Check Item J

CHECK ITEM 1

39a. During the past 12 months -

(1) Were any additions made to your property such as a room, basement, porch, or garage?

(2) Did any one job cost \$250 or more?

39b. Have any alterations been made to your property such as remodeling the kitchen or a bathroom, installing walks, driveways, fences, storm windows or doors, or planting trees or shrubbery?

(1) Did any one job cost \$250 or more?

39c. (1) Have you had any replacement jobs on your property such as resurfacing the roof or eavestroughs, replacing gutters or downspouts, or replacing or installing fixed heating, electrical, plumbing equipment? (Do not include appliances such as clothes washers, refrigerators, window air conditioners, etc.)

(2) Did any one job cost \$250 or more?

39d. (1) Have you made any repairs on your property such as painting or papering a room, or patching a driveway or broken fence?

(2) Did any one job cost \$250 or more?

48. Please look on this card.

SHOW FLASHCARD F

What are the reasons . . . (Reference person) moved FROM that residence?
 (Mark all answers given)

EMPLOYMENT

1 Job transfer
 2 To look for work
 3 To take a new job
 4 Entered or left U.S. Armed Forces
 5 Retirement
 6 Commuting reasons
 7 To attend school
 8 Other employment reasons - Specify

FAMILY

9 Needed larger house or apartment
 10 Divorced or separated
 11 Widowed
 12 To be closer to relatives
 13 Newly married
 14 Family increased
 15 Family decreased
 16 To establish own household
 17 Other family reasons - Specify

OTHER

18 Neighborhood overcrowded
 19 Change in racial or ethnic composition of neighborhood
 20 Crime
 21 Wanted neighborhood with children
 22 Wanted neighborhood without children
 23 Wanted better neighborhood
 24 Wanted more expensive place or better investment
 25 Wanted to own residence
 26 Wanted better house
 27 Wanted to rent residence
 28 Wanted residence with more conveniences
 29 Lower rent or less expensive house
 30 Wanted change of climate
 31 Displaced by urban renewal, highway construction or other public activity
 32 Displaced by private action
 33 Schools
 34 Natural disaster
 35 Other - Specify

INTERVIEWER INSTRUCTION

Two or more boxes marked in item 48 - Ask 49
 If only ONE box is marked in item 48 - Transcribe code to item 49 and fill Check item N, page 26

49. Of the reasons you just mentioned, what was the MAIN reason . . . (Reference person) moved from previous residence?
 (Reference person)

Box number of MAIN reason

CHECK ITEM S	<p>(See item 12, page 13)</p> <p><input type="checkbox"/> Box 9, "No heating equipment" marked in item 12 - Skip to Check item U, page 34</p> <p><input type="checkbox"/> All others - Read introduction and ask 74a.</p>
SECTION	<p>The following questions are concerned with heating equipment, type of fuel used, and insulation.</p>
74a. Does this house (apartment) have a fireplace or heating stove?	<p>(50) <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> No - Skip to Check item T</p>
b. Is it (Are any of them) now in working order?	<p>(51) <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> No - Skip to Check item T</p>
c. In the past 12 months, what was the MAIN fuel used in the fireplace or heating stove?	<p>(52) <input type="checkbox"/> Wood or wood by-products</p> <p><input type="checkbox"/> Coal</p> <p><input type="checkbox"/> Other fuel } Skip to Check item T</p> <p><input type="checkbox"/> None</p>
d. In the past 12 months, was ALL the wood or wood by-products, used in the fireplace or heating stove perished?	<p>(53) <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p>
CHECK ITEM T	<p>MAIN HEATING EQUIPMENT</p> <p>(See item 12, page 13)</p> <p>1 <input type="checkbox"/> Central warm-air furnace with ducts in individual rooms</p> <p>2 <input type="checkbox"/> Heat pump</p> <p>3 <input type="checkbox"/> Steam or hot water system</p> <p>4 <input type="checkbox"/> Built-in electric units (permanently installed in wall, ceiling, or baseboard)</p> <p>5 <input type="checkbox"/> Floor, wall or pipeless furnace</p> <p>6 <input type="checkbox"/> Room heaters WITH flue or vent burning gas, oil, or kerosene</p> <p>7 <input type="checkbox"/> Room heaters WITHOUT flue or vent burning gas, oil, or kerosene</p> <p>8 <input type="checkbox"/> Fireplaces, stoves, or portable room heaters</p> <p>9 <input type="checkbox"/> Item 12 blank, DK, NA, or Refused - Go to Check item U</p>
75. Earlier you told me that your main heating equipment is (Specify heating equipment marked in Check item T). Please look at this card.	<p>(54) Yes</p> <p><input type="checkbox"/> Solar heating equipment</p> <p><input type="checkbox"/> Wood or coal burning stove</p> <p><input type="checkbox"/> Fireplace burning wood or coal</p> <p><input type="checkbox"/> Portable electric heater</p> <p><input type="checkbox"/> Room heater (WITHOUT flue or vent) which burns gas, oil, or kerosene</p> <p><input type="checkbox"/> Something else - Specify</p> <p>No</p>
SHOW FLASHCARD J	<p>In the past 12 months, have you obtained any of these items or supplementary equipment or appliances to heat this house (apartment)?</p> <p>(Mark all answers given)</p>

CHECK ITEM U	<p>(See items 13a-c, page 13)</p> <p><input type="checkbox"/> Central air conditioning - Ask 76</p> <p><input type="checkbox"/> Room units or no air conditioning - Skip to 77</p>
76. Earlier you told me that there is central air conditioning in this house (apartment). Which of the following do you use to reduce your use of central air conditioning?	<p>(57) <input type="checkbox"/> Individual room air conditioning unit</p> <p><input type="checkbox"/> Awnings</p> <p><input type="checkbox"/> Dehumidifier</p> <p><input type="checkbox"/> Ceiling fan</p> <p><input type="checkbox"/> Attic fan</p> <p><input type="checkbox"/> Window fan</p> <p><input type="checkbox"/> Portable fan</p> <p><input type="checkbox"/> None</p>
77. Which fuel is used most for cooking?	<p>(58) Gas/</p> <p><input type="checkbox"/> From underground pipes, serving the neighborhood</p> <p><input type="checkbox"/> Bottled, tank or LP</p> <p><input type="checkbox"/> Electricity</p> <p><input type="checkbox"/> Fuel oil</p> <p><input type="checkbox"/> Kerosene, etc.</p> <p><input type="checkbox"/> Coal or coke</p> <p><input type="checkbox"/> Wood</p> <p><input type="checkbox"/> Other fuel</p> <p><input type="checkbox"/> No fuel used</p>
78a. Which fuel is used most for heating the hot piped water?	<p>(510) Gas/</p> <p><input type="checkbox"/> From underground pipes, serving the neighborhood</p> <p><input type="checkbox"/> Bottled, tank, or LP</p> <p><input type="checkbox"/> Electricity</p> <p><input type="checkbox"/> Fuel oil</p> <p><input type="checkbox"/> Kerosene, etc.</p> <p><input type="checkbox"/> Coal or coke</p> <p><input type="checkbox"/> Wood</p> <p><input type="checkbox"/> Solar heat - Skip to Check item W</p> <p><input type="checkbox"/> Other fuel - Specify</p>
b. Do you have a solar water heating unit which you use in addition to your main water heating equipment?	<p>(511) <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p> <p><input type="checkbox"/> No fuel used - Skip to Check item W</p>

Facsimile of the Annual Housing Survey Questionnaire: 1980—Continued

Section VII - ENERGY CONSERVATION SUPPLEMENT - Continued
(See CC Item 14)

CHECK ITEM Y
79. In the last 12 months has there been a change in the type of fuel used to heat this house (apartment)?
 1 Yes
 2 No
 3 Don't know

CHECK ITEM X
(See item 80, page 12)
 One-unit structure or mobile home or trailer - Ask 80a
 Two-or-more unit structure - Skip to Check Item Z, page 36

80a. Does this house (mobile home or trailer) have:
 1. storm windows, double-paned glass, plastic window covers, closable shutters or other protective window coverings that are used to help reduce heat loss during the winter?
 1 Yes, all windows
 2 Yes, some windows
 3 No - Ask 81a

81a. Does this house (mobile home or trailer) have storm doors?
 1 Yes, all doors
 2 Yes, some doors
 3 No - Ask 82a

82a. Does this house (mobile home or trailer) have attic or roof insulation?
 1 Yes - Ask 82b
 2 No - Ask 83
 3 Don't know - Ask 83

83. During the past 12 months, were any of the following added or installed -
 (1) Well insulation? 1 Yes 2 No
 (2) Caulking or weather stripping? 1 Yes 2 No
 (3) Insulation for hot water pipes or hot water heater? 1 Yes 2 No
 (4) Insulation in floors or crawl spaces? 1 Yes 2 No
 (5) Any other thermal or heat insulation? 1 Yes 2 No
 What kind? _____

CHECK ITEM Y
(See item 7a and 7b, page 12)
 Owned or being bought (first "Yes" box marked in item 7) AND
 "Yes" marked in 80b OR 81b OR 82b OR 83 - Ask 84
 All others - Skip to Check Item Z

84. What was the total cost of the (Specify "Yes" answers mentioned in items 80b, 81b, 82b, and 83) which was (were) added or installed during the past 12 month?
 1 \$1-49
 2 50-99
 3 100-249
 4 250-499
 5 500-999
 6 1,000 or more
 7 Don't know
 8 No charge, or none

Section IX - CONDOMINIUM/COOPERATIVE SUPPLEMENT
(See Check Item C, page 14)

CHECK ITEM Z
 Owned as a cooperative (box 1 marked) - Ask 86
 Owned as a condominium (box 2 marked) - Ask 86
 Rented for cash or occupied without payment of cash rent (box 6, 7, 8, 9, 10 or 11 marked) - Ask 85
 All other (box 3, 4 or 5) - Skip to Check Item BB, page 39

85. Is this apartment (house) part of a condominium?
 1 Yes - Skip to 88
 2 No - Go to Check Item BB, page 39

86. Was this building converted from rental units to condominium (cooperative) units?
 1 Yes
 2 No
 3 Don't know } Skip to 88

87. In what year was this unit converted to condominium (cooperative) ownership?
 1 1979-1980
 2 1976-1978
 3 1970-1975
 4 Before 1970
 5 Don't know

88. A development is a building or group of buildings under a single management. How many condominium (cooperative) units are there in THIS development?
 (Read categories)
 1 Less than 50
 2 50-99
 3 100-499
 4 500 or more
 5 Don't know

89. Are any of the (any other) units in this development rented or for rent?
 1 Yes
 2 No
 3 Don't know

CHECK ITEM AA
 (1) (See item 8, page 1)
 URE Interview - Skip to Check Item BB, page 39
 Regular Interview - Go to Check Item AA(2) below
 (2) (See Check Item C, page 14)
 Owned as a condominium (box 2 marked) - Go to Check Item AA(3) below
 All others - Skip to Check Item BB, page 39
 (3) (See item 41, page 23)
 Kind of mortgage specified (box 1, 2, 3 or 4 marked or "NA," "DK" or "REF" entered) - Ask 90
 Item 41 blank - Skip to 91

90. Earlier you told me that this unit is mortgaged. What are the required payments to the lender? If more than one mortgage (loan) on this condominium give total amount of payments.
 1 \$ _____ PER _____
 2 _____ Month
 3 _____ Year
 4 Other - Specify _____

91a. Do you pay for fire and hazard insurance?
 1 Yes
 2 No - Skip to 92

b. What is the YEARLY cost? Also include the cost of any fire and hazard insurance that is included in mortgage payments.
 1 \$ _____
 2 \$ _____

Facsimile of the Annual Housing Survey Questionnaire: 1980—Continued

Section IX - CONDOMINIUM/COOPERATIVE SUPPLEMENT - Continued	
92a. Are the real estate taxes included in the mortgage payment?	(538) 1 <input type="checkbox"/> Yes - Ask C 2 <input type="checkbox"/> No
b. Do you pay real estate taxes separately?	(539) 1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No - Skip to 93
c. What is the YEARLY cost? (Do not include taxes in arrears from previous years)	(540) \$ <u>00</u>

CHECK ITEM EE

(See item 110(25), page 42)

Interior odors or fumes - Ask 111
 No interior odors or fumes - Skip to 112

Describe: _____

OFFICE USE ONLY
 1 F
 2 D

111. You mentioned serious odors or fumes inside your home. What caused the odors or fumes?
 1 Don't know
 2 Yes
 3 No
 4 Don't know

112. Does your mobile home have a RED metal manufacturer's label?
 1 Yes
 2 No
 3 Don't know

(See Check Item C, page 14)

Owner occupied mobile home or trailer on less than 10 acres (box 3 marked) -
 (See item 122, page 13)
 Installation loan or contract - Skip to 115
 Owned free and clear - Ask 113
 Rented for cash (box 8 marked) - Skip to Check Item II, page 46
 All others - Skip to 123

113. Did you place or assume a mortgage (loan) when you acquired this mobile home?
 1 Yes - Skip to 115
 2 No

114. How did you acquire this mobile home?
 1 Inheritance or gift
 2 Paid all cash
 3 Other manner - Specify _____

115. Including this site, on how many sites have you placed this mobile home since you have owned it?
 1 1
 2 2-3
 3 4 or more

(See item 25b(5), page 16, Real Estate Taxes)
 An entry of an amount, "NA," "DK," or "Refused" in item 25b(5) - Ask 116
 Item 25b(5) is blank - Skip to 117

116a. Earlier you told me that you pay real estate taxes. Do you also pay a personal property tax, or an annual license fee or similar annual charge, for this mobile home?
 1 Personal property tax
 2 Yes - license fee or similar annual charge
 3 No
 4 Don't know } Skip to Check Item HH

116b. What is the yearly cost? (If more than one tax or fee, enter total yearly cost of all such payments. Do not include real estate taxes.)
 \$ _____ } Skip to Check Item HH

Facsimile of the Annual Housing Survey Questionnaire: 1980—Continued

Section X - MOBILE HOME SUPPLEMENT - Continued

117a. Do you pay a personal property tax or an annual license fee or similar annual charge for this mobile home?
 1 Yes - personal property tax
 2 Yes - license fee or similar annual charge
 3 No
 4 Don't know } Skip to Check Item HH

b. What is the yearly cost? (If more than one tax or fee, enter total yearly cost of all such payments.)
 (70) \$ 00

(See item 20, page 15)
 Site owned - Ask 118
 Site rented or occupied without payment of cash rent - Skip to 119
 Item 20 is blank - Go to item 124

118. How much do you think this property, that is, mobile home and land, would sell for on today's market?
 SHOW FLASHCARD D

(70) Less than \$5,000
 2 \$5,000-\$7,499
 3 7,500-9,999
 4 10,000-12,499
 5 12,500-14,999
 6 15,000-17,499
 7 17,500-19,999
 8 20,000-22,499
 9 22,500-24,999
 10 25,000-27,499
 11 27,500-29,999
 12 30,000-34,999
 13 35,000-39,999
 14 40,000-44,999
 15 45,000-49,999
 16 50,000-54,999
 17 55,000-59,999
 18 60,000-64,999
 19 65,000-69,999
 20 70,000-74,999
 21 75,000 or more
 SKIP TO 124

119. How much do you think this mobile home would sell for on today's market?
 SHOW FLASHCARD D

(70) Less than \$5,000
 2 \$5,000-\$7,499
 3 7,500-9,999
 4 10,000-12,499
 5 12,500-14,999
 6 15,000-17,499
 7 17,500-19,999
 8 20,000-22,499
 9 22,500-24,999
 10 25,000-27,499
 11 27,500-29,999
 12 30,000-34,999
 13 35,000-39,999
 14 40,000-44,999
 15 45,000-49,999
 16 50,000-54,999
 17 55,000-59,999
 18 60,000-64,999
 19 65,000-69,999
 20 70,000-74,999
 21 75,000 or more

120. What is the MONTHLY rent for this site?
 (Mark the frequency of payment box and enter the MONTHLY site rent. (If rent is not paid by the month, compute the MONTHLY site rent in "Notes" space, and enter the monthly site rent on the line provided.)

(70) \$ 00 Per month
 0 No cash rent
 1 More frequently than once a month
 2 Less frequently than once a month
 3 Once a month

NOTES

SKIP TO 124

(See item 27, page 17)
 Site owned - Skip to 123
 Site rented or occupied without payment of cash rent - Ask 121

121. Earlier you told me you rent this mobile home site. Is the site rent included with the rent for the mobile home?
 (71) 1 Yes - Skip to 123
 2 No

122. What is the MONTHLY rent for this site?
 Mark the frequency of payment box and enter the MONTHLY site rent. (If rent is not paid by the month, compute the MONTHLY site rent in "Notes" space, and enter the monthly site rent on the line provided.)

(71) \$ 00 Per month
 0 No cash rent
 1 More frequently than once a month
 2 Less frequently than once a month
 3 Once a month

NOTES

123. Was this mobile home new when... (Reference person) moved in?
 (71) 1 Yes
 2 No
 3 Don't know

124. Would you recommend mobile home living to others?
 (71) 1 Yes
 2 Sometimes
 3 No

125. How would you rate this mobile home as a place to live - would you say it is excellent, good, fair, or poor?
 (71) 1 Excellent
 2 Good
 3 Fair
 4 Poor - Ask 126

126. Why did you rate this mobile home as a poor place to live? (Mark all answers given)

(71) 1 Location (neighborhood problems, commuting problems, etc.)
 2 Quality of construction or workmanship
 3 Size (mobile home is too small or too large)
 4 Safety (fire hazard, wind or flood hazard, falls or other personal injuries)
 5 Too expensive - (utilities, maintenance, charges or fees)
 6 Bad investment
 7 Other - Specify _____

Section XII - JOBS AND WORK

(See Check item X, page 23)

CHECK ITEM DO

Reference person moved here during the past 12 months — Read the introduction below and ask 149

Reference person did not move here during the past 12 months — Go to next worker or if last worker, go to Control Card item 38a

INTRODUCTION

The following questions are concerned with how . . . (Reference person) usually traveled to work while living at his (her) previous residence.

149. Did . . . (Reference person) have a job while living at his (her) previous residence? Yes No — Go to INTERVIEWER INSTRUCTION below

150. At the time . . . (Reference person) lived in his (her) previous residence, was . . . (Reference person's) usual place of work the same as it is now? Yes No

151. What was . . . (Reference person's) principal means of transportation to work?

Car Truck Van Drove alone

1 Carpool

2 Bus or streetcar

3 Subway or elevated

4 Railroad

5 Taxicab

6 Motorcycle or moped

7 Bicycle

8 Other type of vehicle

9 Walked only

10 Worked at home — Go to INTERVIEWER INSTRUCTION below

11

152. Did . . . (Reference person) usually report to the same location to begin work each day? Yes No — Go to INTERVIEWER INSTRUCTION below

153. How many minutes did it usually take . . . (Reference person) to get from home to work? _____ Minutes

154. How many miles did . . . (Reference person) travel from home to work? _____ Miles

OR _____ Miles

o Less than 1 mile

SAMPLE DESIGN

The 1980 estimates are based on data collected from mid August 1980 through December 1980 for the Annual Housing Survey (AHS), which was conducted by the Bureau of the Census, acting as collection agent for the Department of Housing and Urban Development. The sample for this survey was spread over 461 sample areas (called primary sampling units), comprising 923 counties and independent cities with coverage in each of the 50 States and the District of Columbia.

Approximately 75,300 sample housing units (both occupied and vacant) were eligible for interview in the 1980 Annual Housing Survey. Of this number, 4,200 interviews were classified as "noninterview" for various reasons. Occupied housing units were classified as "noninterview" mainly, because the occupants refused to be interviewed after repeated calls. For vacant housing units, interviews were not obtained because an informed respondent was not found after repeated visits. In addition to the 75,300 eligible housing units, there were also 6,500 sample units which were visited but were ineligible for interview for the AHS in terms of collecting information relevant to the 1980 housing inventory.

Selection of sample areas—The United States was divided into areas made up of counties and independent cities referred to as primary sampling units (PSU's). These PSU's were then grouped into 376 strata, 156 of which consisted of only 1 PSU in sample with certainty. These 156 strata were mostly the larger SMSA's and were called self-representing (SR) since the sample from the sample area represented just that PSU. Each one of the other 220 strata consisted of a group of PSU's and were referred to as non-self-representing (NSR), since the sample of housing units from the sample PSU in a stratum represented the other PSU's in the stratum as well.

One PSU was selected from each NSR stratum with probability proportionate to the 1970 census population of the PSU. (This resulted in 220 NSR sample PSU's.) In addition, the NSR

strata were grouped into 110 pairs and 1 stratum was picked at random from each pair. From this stratum, an additional PSU was selected independently of the other PSU selected from this stratum. Since the two PSU's were independently selected, it was possible for the same PSU to be selected twice. This occurred in 25 instances, producing an additional 85 NSR sample PSU's, thus giving a grand total of 461 PSU's.

Designation of sample housing units for the 1980 survey—The sample housing units designated to be interviewed in the 1980 survey consisted of the following categories, which are described in detail in succeeding sections.

1. All sample housing units that were interviewed in the 1979 survey (which included all sample housing units that were selected as part of the 1976 Coverage Improvement Program).
2. All sample housing units that were either type A noninterviews (i.e., units eligible to be interviewed) or type B noninterviews (i.e., units not eligible for interview at the time of survey but which could become eligible in the future) in the 1979 survey. (For a list of reasons for type A and type B noninterviews, see the facsimile of the 1980 AHS questionnaire, App-16.)
3. All sample housing units that were selected from the list of building permits issued since the 1979 survey. (This sample represented the housing units built in permit-issuing areas, since the 1979 survey.)
4. Units added as the result of the updated listings in selected areas which do not issue building permits.

Selection of the 1973 sample housing units—The overall sampling rate used to select the sample for the 1973 AHS was about 1 in 1,366. The within-PSU sampling rate for the AHS was determined so that the overall probability of selection for each sample housing unit was the same (e.g., if the probability of selecting a NSR PSU was 1 in 10, then the within-PSU sampling rate would be 1 in 136.6).

Within the sample PSU's, a sample of the housing units enumerated in the 1970 Census of Population and Housing was selected for the AHS. In addition, a sample of new construction building permits was also selected to represent the units constructed since the 1970 census. These samples were selected at about twice the rate mentioned previously (i.e., at 2 in 1,366), thereby producing a sample twice as large as needed. This sample was split into two equal-sized samples—one to be used for the AHS, and one to be held in reserve for possible future use for AHS. The procedure used to split this sample into equal-sized samples is described in the next section.

The sample of 1970 census units was selected in several stages. Within the sample PSU's, the first step was the selection of a sample of census enumeration districts (ED's), administrative units used in the 1970 census. The probability of selection for an ED was proportional to the following 1970 census counts of housing units (HU's) and persons in group quarters, combined in the following formula:

$$\frac{\text{Number of HU's in the ED} + \text{Number of group quarters persons in the ED}}{4}$$

The next step was to select an expected cluster of about four neighboring housing units within each sample ED. For most of the ED's, the selection was accomplished using the list of addresses for the ED as compiled in the 1970 census. However, in those ED's where addresses were incomplete or inadequate (mostly rural areas), the selection process was accomplished using area sampling methods. These ED's were divided into segments (i.e., small land areas with well-defined boundaries, having an expected size of four, or a multiple of four, housing units) and a segment was selected. Those selected segments with an expected size which was a multiple of four were further subsampled at the time of enumeration so that an expected four housing units were chosen for interview.

The sample of new construction units was selected from building permits issued since January 1970. Within each sample PSU, the building permits were chronologically ordered by month issued, and compact clusters of approximately four housing units were created. These clusters were then sampled at the rate of 2 in 1,366. Housing units constructed since the 1970 census in areas which do not issue building permits were brought into the sample as a result of the area sample described.

Splitting of the sample—The described sample selection procedure produced clusters (or segments) of size-four housing units for the sample taken from the census address frame, the new construction frame, and the area sampling frame (mainly rural areas). Clusters of this size should result in a minimum loss in precision for estimates of housing characteristics in rural areas because of the heterogeneity of neighboring units. However, clusters of size-two housing units, were considered to be more optimum within those areas where the housing characteristics of neighboring units tend to be very similar (i.e., urban areas and new construction units). A splitting operation was then carried out for clusters selected from the census

address and the new construction frames. This consisted of halving each sample cluster from these frames. Thus, two housing units from each of these clusters were included in the survey and two housing units were held in reserve. No splitting operation was carried out within the clusters selected from the area sampling frame; every other area sample cluster of four housing units was used for the survey and the remaining clusters were assigned to the reserve sample.

Selection of supplemental sample housing units in rural areas—In 1974, it was decided to increase the reliability of the AHS estimates of rural housing characteristics by doubling the number of sample housing units from rural areas. This was accomplished by reactivating the reserve sample, selected in the original sampling operations in 1973, from rural areas only. For the reserve sample selected in census address and new construction frames, the other half of each rural cluster (an expected two housing units) was reactivated in 1974. Similarly, for the area sampling frame, the entire reserve cluster (an expected four housing units) was reactivated in 1974 if the cluster was rural. This supplementation increased the overall probability of selection for sample housing units in rural areas to about 2 in 1,366; whereas, the overall probability of selection for sample housing units in urban areas remained at 1 in 1,366.

Selection of sample housing units for the 1976 Coverage Improvement Program—The 1976 Coverage Improvement Program was undertaken to correct certain deficiencies in the AHS national sample from the census address and new construction frames. The coverage deficiencies included the following units:

1. New construction, from building permits issued prior to January 1970 for which construction had not been completed at the time of the 1970 census.
2. Units converted to residential use in structures totally non-residential at the time of the 1970 census.
3. Houses that have been moved onto their present site, since the 1970 census.
4. Mobile homes placed in parks either missed in the 1970 census or established since the 1970 census.
5. Mobile homes placed outside parks since the 1970 census or vacant at the time of the 1970 census.

A sample of new construction units whose permits were issued before January 1970 was selected in two stages. First, units whose permits were issued before January 1970, but which were completed after the census, were identified from the Survey of Construction (SOC), a survey of building permits conducted monthly by the Bureau of the Census. In the second stage, these units were then sampled so that the overall probability of selection was about 1 in 1,320.

A sample of mobile homes placed in a park missed by the census or established after the census was also selected in two stages. During the first stage, a list of mobile home parks was obtained from commercial listings. This list was then supplemented by additional parks identified by a canvassing operation similar to that performed in ED's where area sampling methods are used. The second stage consisted of dividing the

parks into clusters of an expected size of four sites. These clusters were then sampled so that the overall probability of selection was about 1 in 1,366.

For the remaining units (i.e., mobile homes placed outside parks since the 1970 census, mobile homes vacant at the time of the 1970 census, units converted from nonresidential to residential use since the 1970 census, and houses that had been moved onto their present site since the 1970 census), the sampling was done in three stages. First, a subsample of the regular AHS sample units from the census address frame was selected. Second, succeeding structures that had been eligible to be selected from the census address frame were listed until eight structures (excluding mobile home parks) were found. Finally, the intervening structures that had been listed which did not have a chance of selection in the AHS were identified and the units within these structures were interviewed.

1977 sample reduction—By 1977, the addition to the sample from primarily new construction and the coverage improvements had increased the total sample size (interviews plus noninterviews) to about 81,000. The sample was reduced by about 7 percent to approximately 75,000 in 1977. However, this reduction did not include any CEN-SUP¹ units or units which were selected as part of the 1976 Coverage Improvement Program. Thus, the overall probability of selection for these latter units remained unchanged, and for the rest of the units their probability of selection was about 1 in 1,472 if they were urban and about 1 in 736 if they were rural.

ESTIMATION

In 1980, the AHS estimates employed a three-stage ratio estimation procedure. However, prior to implementation of the procedure, the basic weight (i.e., the inverse of the probability of selection) was adjusted to account for the type A noninterview housing units encountered in the AHS. This noninterview adjustment was done separately for occupied and vacant units. The noninterview adjustment was equal to the following ratio:

$$\frac{\text{Interviewed housing units} + \text{Noninterviewed housing units}}{\text{Interviewed housing units}}$$

The first-stage ratio estimation procedure was employed for sample housing units from non-self-representing (NSR) PSU's only. This procedure was designed to reduce the contribution to the variance arising from the sampling of PSU's. The first-stage ratio estimation procedure takes into account the differences that existed at the time of the 1970 census in the distribution by tenure and residence of the housing population estimated from the sample NSR PSU's and that of the NSR housing population in each of the four census regions of the country.

¹CEN-SUP units resulted from a 1970 census evaluation study and represented units missed in the 1970 census.

The first-stage ratio estimation factor for each specified category was as follows:

$$\frac{\text{The 1970 census housing population in the residence-tenure category for all NSR strata in a census region}}{\text{Estimates of the housing population category using 1970 census housing counts for sample NSR PSU's in a census region}}$$

The numerators of the ratios were calculated by obtaining the 1970 census housing counts for each of the residence-tenure categories for each NSR stratum and summing these counts across the NSR strata in each census region. The denominators were calculated by obtaining the 1970 census housing counts for each of the residence-tenure categories for each NSR sample PSU, weighting these counts by the inverse of the probability of selecting that PSU, and summing these weighted counts across the NSR sample PSU's in each census region. The computed first-stage ratio estimation factor was then applied to the existing weight for each NSR sample unit in each first-stage ratio estimation category.

The second-stage ratio estimation procedure was designed to adjust the AHS sample estimate of two categories of conventional new construction units, i.e., two categories of sample units built April 1, 1970, or later, to two independently derived current estimates where a known deficiency in the AHS sample exists (see the section on nonsampling error) for each of the four regions. These estimates were considered to be the best estimates available for the number of conventional new construction units in these categories.

The second-stage ratio estimation factor was as follows:

$$\frac{\text{Current best estimate of new construction in the category}}{\text{AHS sample estimate of new construction units in the category}}$$

The numerators of the ratios were derived from data based on the Survey of Construction (SOC). The denominators of the ratios were obtained from the weighted estimates for the AHS sample units using the existing weight after the first-stage ratio estimation procedure. The computed second-stage ratio estimation factor was then applied to the existing weight for each sample unit in each second-stage ratio estimation category.

The third-stage ratio estimation procedure was employed for all the AHS sample units. This procedure was designed to adjust the AHS sample estimates of housing (i.e., the estimates employing the noninterview, first-stage, and second-stage adjustments) to current vacant housing estimates for 4 categories of vacant housing units and to independently derived current housing estimates for 24 categories of occupied housing units. Each of these categories is a combination of the characteristics of residence, tenure, race of householder, and sex of householder.

The third-stage ratio estimation factor for each specified category was as follows:

$$\frac{\text{Current independent estimate of housing units in the category}}{\text{AHS sample estimate of housing units in the category}}$$

The numerators of the ratios for occupied housing units were derived from data based on the Current Population Survey

(CPS), a sample household survey conducted monthly by the Bureau of the Census. The numerators of the ratios for vacant housing units were derived from data based on the Housing Vacancy Survey (HVS), a quarterly vacancy survey also conducted by the Bureau of the Census. The denominators of the ratios were obtained from the weighted estimates for the AHS sample units, using the existing weight after the second-stage ratio estimation procedure. The computed third-stage ratio estimation factor was then applied to the existing weight for each sample unit in each third-stage ratio estimation category.

The second-stage and the third-stage ratio estimation procedures were iterated in order to bring the AHS estimates into close agreement with both sets of "independent" estimates. The second-stage was modified so that the estimates for all 24 categories of new construction would be identical to the estimates before the third-stage. Hence, the repeated second-stage had the effect of controlling the AHS sample estimates of new construction units to the "unbiased" sample estimates for 22 categories of new construction units for each of the 4 regions (i.e., 14 categories for conventional new construction units and 8 for new construction mobile homes) and of adjusting the AHS sample estimate of 2 categories of conventional new construction units to an independently derived current estimate.

The numerators were either the unbiased weighted estimates for the AHS sample units, using the existing weight after the first-stage ratio estimation procedure (i.e., the estimates employing the noninterview and first-stage adjustments) or the independent estimate derived from data based on the Survey of Construction (SOC).

The denominators of the ratios in this iterative process were obtained from the weighted estimates for the AHS sample units after the previous stage of ratio estimation. The factors resulting from this iterative process were then applied to the existing weight on the appropriate records, and the resulting product was used as the final weight for tabulation.

The third-stage ratio estimation procedure, as well as the overall estimation procedure, reduced the sampling error for most statistics below what would have been obtained by simply weighting the results of the sample by the inverse of the probability of selection. The distribution of the housing population selected for the sample differed somewhat, by chance, from that of the Nation as a whole in such basic housing characteristics as tenure, vacancy status, residence, race of householder, and sex of householder. These characteristics are probably closely correlated with other housing characteristics measured for the AHS. Therefore, through the use of the three-stage ratio estimation procedure one can expect the sample estimate to be improved substantially.

RELIABILITY OF THE ESTIMATES

There are two types of possible errors associated with estimates based on data from sample surveys; sampling and nonsampling errors. The following is a description of the sampling and nonsampling errors associated with the AHS national sample.

Sampling errors—The particular sample used for this survey is one of a large number of possible samples of the same size that

could have been selected using the same sample design. Even if the same schedules, instructions, and interviewers were used, estimates from each of the different samples would differ from each other. The variability between estimates from all possible samples is defined as sampling error. One common measure of sampling error is the standard error which measures the precision with which an estimate from a sample approximates the average result of all possible samples. In addition, the standard error, as calculated for this report, also partially reflects the variation in the estimates due to some nonsampling errors, but it does not measure, as such, any systematic biases in the data. Therefore, the accuracy of the estimates depends on both the sampling and nonsampling errors, measured by the standard error, and biases and some additional nonsampling errors not measured by the standard error.

The sample estimate and its estimated standard error enable one to construct interval estimates so that the interval includes the average result of all possible samples with a known probability. For example, if all possible samples were selected, and each of these samples was surveyed under essentially the same general conditions and an estimate and its estimated standard error were calculated for each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate, to one standard error above the estimate, would include the average result of all possible samples;
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples;
3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average result of all possible samples either is or is not contained in any particular computed interval. However, for a particular sample one can say with specified confidence that the average result of all possible samples is included in the constructed interval.

The figures presented in the following tables are approximations to the standard errors of various estimates shown in this report. In order to derive standard errors that would be applicable to a wide variety of items and also could be prepared at a moderate cost, a number of approximations were required. As a result, the tables of standard errors provide an indication of the order of magnitude of the standard errors rather than the precise standard error for any specific item.

Standard errors of estimates of levels—Tables I and II present the standard errors applicable to the 1980 National housing inventory estimates in this report. Tables III and IV present the standard errors applicable to estimate for the Northeast, North Central, and West Regions, and tables III and V present the standard errors applicable to estimates for the South Region. Linear interpolation should be used to determine standard errors for levels of estimates not specifically shown in tables I through V.

Standard errors of estimates of percentages—The reliability of an estimated percentage, computed by using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more.

Tables VI through X present the standard errors of estimated percentages. Table VI shows the approximate standard errors of all national estimated percentages of housing units except those pertaining to the specified items in table II. The standard errors shown in table VII should be used for those specified items. Table VIII shows the approximate standard errors of the estimated percentages of housing units for the Northeast, North Central, South, and West Regions except for those percentages pertaining to the specified items in table IV. Table IX should be used for those specified items for the Northeast, North Central, and West Regions and table X for the South Region. Two-way interpolation should be used to determine standard errors for estimated percentages not specifically shown in tables VI through X.

Included in tables I through X are estimates of standard errors for estimates of zero and zero percent. These estimates of standard errors are considered to be overestimates of the true standard errors and should be used primarily for construction of confidence intervals for characteristics when an estimate of zero is obtained.

Standard errors of ratios—For ratios of the form $(100) (x/y)$, where x is not a subclass of y, tables VI through X underestimate the standard error of the ratio when there is little or no correlation between x and y. For this type of ratio, a better

TABLE I. Standard Errors of Estimated Numbers of Housing Units: 1980 (Excluding Estimates of Housing Units Pertaining to New Construction, Lacking Complete Kitchen Facilities, No Bedrooms, No Bathrooms, Source of Water-Individual Well, Lacking Complete Plumbing, Mobile Homes, and Housing Units With Spanish-Origin Householder)

(68 chances out of 100)

Size of estimate (000)	Standard error		Size of estimate (000)	Standard error	
	Total or White (000)	Black (000)		Total or White (000)	Black (000)
0	2	2	1,000 . . .	42	39
5	3	3	2,500 . . .	65	55
10	4	4	5,000 . . .	91	59
25	7	7	7,500 . . .	109	37
50	9	9	10,000 . . .	124	—
100	13	13	25,000 . . .	176	—
250	21	21	50,000 . . .	192	—
500	29	29	80,000 . . .	101	—

approximation of the standard error may be obtained by letting the standard error of the ratio be approximately equal to:

$$(100) \left(\frac{x}{y} \right) \sqrt{\left(\frac{\sigma_x}{x} \right)^2 + \left(\frac{\sigma_y}{y} \right)^2}$$

- where: x = the numerator of the ratio
- y = the denominator of the ratio
- σ_x = the standard error of the numerator
- σ_y = the standard error of the denominator

Illustration of the use of the standard error tables. Illustration 1—Table A-2 of this report shows that in the United States there were 9,525,000 specified owner-occupied housing units with two bedrooms in 1980. Interpolation of the standard error in table I shows the the standard error of an estimate of this size is approximately 121,000. The following procedure was used in interpolating.

The information presented in the following table was extracted from standard error table I. The entry for "x" is the one sought.

Size of estimate (000)	Standard error (000)
7,500	109
9,525	x
10,000	124

By vertically interpolating between 109 and 124, the entry for "x" is determined to be 121.

$$9,525 - 7,500 = 2,025$$

$$10,000 - 7,500 = 2,500$$

$$109 + \frac{2,025}{2,500} (124 - 109) = 121$$

Consequently, the 68-percent confidence interval, as shown by these data, is from 9,404,000 to 9,646,000 housing units. Therefore, a conclusion that the average estimate of 1980 housing units of this type lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate, derived from all possible samples, lies within the interval from 9,331,000 to 9,719,000 housing units with 90 percent confidence; and that the average estimate lies within the interval from 9,283,000 to 9,767,000 housing units with 95 percent confidence.

Table A-2 also shows that of the 9,525,000 specified owner-occupied housing units with two bedrooms in 1980, 1,151,000, or 12.0 percent, were valued between \$10,000 and \$19,999. Interpolation of the standard error in table VI (i.e., interpolation on both the base and percent) shows that the standard error of the above percentage is 0.4 percentage points. The following procedure was used in interpolating.

The information presented in the following table was extracted from table VI. The entry for "p" is the one sought.

Base of percentage (000)	Estimated percentage		
	10	12	15
7,500	0.5	a	0.5
9,525		p	
10,000	0.4	b	0.5

- By horizontal interpolation between 0.5 and 0.5, the entry for cell "a" is determined to be 0.5.

$$12.1 - 10.0 = 2.1$$

$$15.0 - 10.0 = 5.0$$

$$0.5 + \frac{2.1}{5.0} (0.5 - 0.5) = 0.5$$

- By horizontal interpolation between 0.4 and 0.5, the entry for cell "b" is determined to be 0.4.

$$12.1 - 10.0 = 2.1$$

$$15.0 - 10.0 = 5.0$$

$$0.4 + \frac{2.1}{5.0} (0.5 - 0.4) = 0.4$$

- By vertical interpolation between 0.5 and 0.4, the entry for "p" is determined to be 0.4.

$$9,525 - 7,500 = 2,025$$

$$10,000 - 7,500 = 2,500$$

$$0.5 + \frac{2,025}{2,500} (0.4 - 0.5) = 0.4$$

TABLE II. Standard Errors of Estimated Numbers of Housing Units Pertaining to New Construction, Lacking Complete Kitchen Facilities, No Bedrooms, No Bathrooms, Source of Water-Individual Well, Lacking Complete Plumbing, Mobile Homes, and Housing Units With Spanish-Origin Householder: 1980

(68 chances out of 100)

Size of estimate (000)	Standard error		Size of estimate (000)	Standard error	
	Total or White (000)	Black (000)		Total or White (000)	Black (000)
0	2	2	1,000 ...	48	45
5	3	3	2,500 ...	76	64
10	5	5	5,000 ...	105	69
25	8	8	7,500 ...	127	42
50	11	11	10,000 ...	144	—
100	15	15	25,000 ...	204	—
250	24	24	50,000 ...	223	—
500	34	33			

Consequently, the 68-percent confidence interval, as shown by these data, is from 11.7 to 12.5 percent; the 90-percent confidence interval is from 11.5 to 12.7 percent; and the 95-percent confidence interval is from 11.3 to 12.9 percent.

Illustration II—Table A-2 of this report shows that in the United States in 1980 there were 5,941,000 specified owner-occupied housing units whose source of water was an individual well. Interpolation of the data in table II shows that the standard error of an estimate of this size is approximately 113,000. Therefore, a conclusion that the average estimate, derived from all possible samples, of 1980 specified owner-occupied housing

TABLE III. Standard Errors of Estimated Numbers of Housing Units Pertaining to the Northeast, North Central, South, and West Regions: 1980 (Excluding Estimates of Housing Units Pertaining to New Construction, Lacking Complete Kitchen Facilities, No Bedrooms, No Bathrooms, and Lacking Complete Plumbing for the Northeast, North Central, and West Regions and Excluding Source of Water-Individual Well, and Mobile Homes for Each of the Regions.)

(68 chances out of 100)

Size of estimate (000)	Standard error (000)	Size of estimate (000)	Standard error (000)

100	14	25,000	216
250	22		

TABLE IV. Standard Errors of Estimated Numbers of Housing Units Pertaining to New Construction, Lacking Complete Kitchen Facilities, No Bedrooms, No Bathrooms, and Lacking Complete Plumbing for the Northeast, North Central, and West Regions and to Source of Water-Individual Well, and Mobile Homes for the Northeast and North Central Regions: 1980

(68 chances out of 100. For estimates pertaining to source of water-individual well and mobile homes for the West Region, apply a factor of 1.66 to the standard errors listed below)

Size of estimate (000)	Standard error (000)	Size of estimate (000)	Standard error (000)
0	3	500	36
5	4	1,000	51
10	5	2,500	80
25	8	5,000	111
50	11	10,000	153
100	16	25,000	218
250	26		

units whose source of water was an individual well, lies within the interval from 5,828,000 to 6,054,000 is correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate, derived from all possible samples, lies within the interval from 5,760,000 to 6,122,000 housing units with 90 percent confidence; and that the average estimate lies within the interval from 5,715,000 to 6,167,000 housing units with 95 percent confidence.

Table A-2 also shows that of the 5,941,000 specified owner-occupied housing units in 1980 whose source of water was an individual well, 185,000, or 3.1 percent, were valued at less than \$10,000. Interpolation in table VII (i.e., interpolation on both the base and the percent) shows that the standard error of the above percentage is 0.4 percentage points. Consequently, the 68-percent confidence interval, as shown by these data is from 2.7 to 3.5 percent; the 90-percent confidence interval is from 2.5 to 3.7 percent; and the 95-percent confidence interval is from 2.3 to 3.9 percent.

Differences—The standard errors shown are not directly applicable to differences between two sample estimates. The standard error of a difference between estimates is approximately equal to the square root of the sum of the squares of the standard errors of each estimate considered separately. This formula is quite accurate for the difference between estimates of the same characteristics in two different areas or the difference between separate and uncorrelated characteristics in the same area. If, however, there is a high positive correlation between the two characteristics, the formula will overestimate the true error. However, if there is a high negative correlation between the two characteristics, the formula will underestimate the true standard error.

Illustration of the computation of the standard error of a difference—Table A-2 shows that in the United States in 1980 there were 1,151,000 specified owner-occupied housing units with two bedrooms valued between \$10,000 and \$19,999. It also shows that in the United States in 1980 there were

1,720,000 specified owner-occupied housing units with two bedrooms valued between \$20,000 and \$29,999. Thus, the apparent difference between the number of 1980 specified owner-occupied housing units with two bedrooms valued between \$10,000 and \$19,999 and those valued between \$20,000 and \$29,999 is 569,000. Interpolation of the data in table I shows the standard error on an estimate of 1,151,000 to be approximately 44,000 and the standard error on an estimate of 1,720,000 to be approximately 53,000. Therefore, the standard error of the estimated difference of 569,000 is about 69,000.

$$69,000 = \sqrt{(44,000)^2 + (53,000)^2}$$

Consequently, the 68-percent confidence interval for the 569,000 difference is from 500,000 to 638,000 housing units. Therefore, a conclusion that the average estimate of this difference, derived from all possible samples, lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, the 90-percent confidence interval is from 459,000 to 679,000 housing units, and the 95-percent confidence interval is from 431,000 to 707,000. Thus, we can conclude with 95 percent confidence that the number of 1980 specified owner-occupied housing units with two bedrooms valued between \$20,000 and \$29,999 is greater than the number valued between \$10,000 and \$19,999 since the 95-percent confidence interval of this difference does not include zero or negative values.

Medians—For the medians presented in certain tables, the sampling error depends on the size of the base and on the distribution upon which the median is based. An approximate method for measuring the reliability of the estimated median is to determine an interval about the estimated median so that there is a stated degree of confidence that the average median from all possible samples lies within the interval. The following procedure may be used to estimate confidence limits of a median based on sample data:

1. From the appropriate standard error tables, determine the standard error of a 50-percent characteristic on the base of the median;
2. Add to and subtract from 50 percent the standard error determined in step 1; and
3. Using the distribution of the characteristic, read off the confidence interval corresponding to the two points established in step 2.

For about 68 out of 100 possible samples, the average median from all possible samples would lie between these two values.

A two-standard-error confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step 1. For about 95 out of 100 possible samples, the average median from all possible samples would lie between these two values.

TABLE V. Standard Errors of Estimated Numbers of Housing Units Pertaining to Source of Water-Individual Well and Mobile Homes for the South Region: 1980

(68 chances out of 100)			
Size of estimate (000)	Standard error (000)	Size of estimate (000)	Standard error (000)
0	4	500	45
5	5	1,000	64
10	6	2,500	99
25	10	5,000	136
50	14	10,000	181
100	20	25,000	225
250	32		

Illustration of the computation of the 95-percent confidence interval for a median—Table A-2 of this report shows the median value of specified owner-occupied housing units with two bedrooms in the United States was \$38,100 in 1980. The base of the distribution, from which this median was determined is 9,525,000 housing units.

1. From table VI, the standard error of a 50-percent characteristic on the base of 9,525,000 is 0.7 percentage points.
2. To obtain a two-standard-error confidence interval on the estimated median, add to and subtract from 50 percent, twice the standard error determined in step 1. This yields percentage limits of 48.6 and 51.4.
3. From table A-2, it can be seen by cumulating the frequencies for the first three categories that 3,272,000 owner-occupied housing units with two bedrooms, or 34.4 percent, had a value less than \$30,000 and an additional 1,839,000 owner-occupied housing units with two bedrooms, or 19.3 percent, had a value between \$30,000 and \$40,000. By linear interpolation, the lower limit of the 95-percent confidence interval is found to be about:

$$\$30,000 + (\$40,000 - \$30,000) \frac{(48.6 - 34.4)}{19.3} = \$37,400$$

Similarly, the upper limit of the 95-percent confidence interval is found to be about:

$$\$30,000 + (\$40,000 - \$30,000) \frac{(51.4 - 34.4)}{19.3} = \$38,800$$

Thus, the 95-percent confidence interval ranges from \$37,400 to \$38,800.

Nonsampling errors—In general, nonsampling errors can be attributed to many sources: Inability to obtain information about all cases, definitional difficulties, differences in the interpretation of questions, inability or unwillingness to provide correct information on the part of respondents, mistakes in recording or coding the data, and other errors of collection, response, processing, coverage, and estimation for missing data. As can be seen from the list, nonsampling errors are not unique to sample surveys since they can, and do, occur in complete censuses as well.

Obtaining a measurement of the total nonsampling error associated with the estimates from a survey is very difficult, considering the number of possible sources of error. However, an attempt was made to measure some of the nonsampling errors associated with the estimates for the 1980 AHS national sample.

Reinterview program—For the AHS national sample, a study was conducted to obtain a measurement of some of the components of the nonsampling error associated with the AHS estimates. A reinterview program was conducted for a subsample of the AHS households. These households were revisited and answers to some of the questions on the AHS questionnaire were obtained again. The original interview and the reinterview were assumed to be two independent readings and thus were the basis for the measurement of the "content" error of these AHS estimates.

TABLE VI. Standard Errors of Estimated Percentages of Housing Units: 1980 (Excluding Estimated Percentages of Housing Units Pertaining to New Construction, Lacking Complete Kitchen Facilities, No Bedrooms, No Bathrooms, Source of Water-Individual Well, Lacking Complete Plumbing, Mobile Homes, and Housing Units With Spanish-Origin Householder)

(68 chances out of 100)

Base of percentage (000)	Estimated percentage							
	0 or 100	1 or 99	2 or 98	5 or 95	10 or 90	15 or 85	25 or 75	50
5	25.9	25.9	25.9	25.9	25.9	25.9	25.9	29.5
10	14.8	14.8	14.8	14.8	14.8	14.9	18.1	20.9
25	6.5	6.5	6.5	6.5	7.9	9.4	11.4	13.2
50	3.4	3.4	3.4	4.1	5.6	6.7	8.1	9.3
100	1.7	1.7	1.8	2.9	4.0	4.7	5.7	6.6
250	0.7	0.8	1.2	1.8	2.5	3.0	3.6	4.2
500	0.3	0.6	0.8	1.3	1.8	2.1	2.6	3.0
1,000	0.2	0.4	0.6	0.9	1.3	1.5	1.8	2.1
2,500	0.07	0.3	0.4	0.6	0.8	0.9	1.1	1.3

10,000	0.02	0.13	0.2	0.3	0.4	0.5	0.6	0.7
25,000	0.01	0.08	0.12	0.2	0.3	0.3	0.4	0.4
50,000	—	0.06	0.08	0.13	0.2	0.2	0.3	0.3
80,000	—	0.05	0.07	0.10	0.14	0.2	0.2	0.2

As part of the reinterview, an additional check was carried out for interviewer evaluation and quality control. This check was made at each of these households to determine if the following was done during the original interview.

1. The correct unit was visited.
2. The correct number of housing units were interviewed at that address.
3. The correct information on "Year Built" was obtained.
4. The correct information on "Tenure" was obtained.
5. The correct information on "Household Composition" was obtained.
6. The correct information "Type of Housing Unit" was obtained.
7. The correct information on "Occupancy Status" was obtained.

The results of the 1980 and 1979 reinterview studies were not available at the time of publication; the results of the 1977 and 1978 reinterview studies which are presented in the Census Bureau memoranda, "Reinterview Results for the Annual Housing Survey—National Sample 1977" and "Reinterview Results for the Annual Housing Survey—National Sample 1978" are presented here.

In 1978, a substantial portion of the reinterview questionnaire was devoted to testing the new questions 1 through 7 (parts a and b). The questions (part a), which were asked only at housing units interviewed in the previous year, determined whether there had been a change since last year in selected nonattitudinal items. If a change had been recorded or the respondent did not know if a change had occurred, part b of

the question, which collects the value of the item, was asked. The reinterview asked these items using the questions as formatted in 1977. Comparing the responses from the differently formatted questions, the 1978 reinterview found that 80 percent of the questions showed low levels of inconsistency with the remainder showing moderate levels.

The 1977 reinterview program showed moderate to high levels of inconsistency with about 21 percent of the nonattitudinal and 56 percent of the attitudinal items showing high levels of inconsistency. But a large proportion (43 percent) of the nonattitudinal items showed a low level of inconsistency. Moderate levels indicate that there are some problems with inconsistent reporting and high levels indicate that improvements are needed in the data collection methods or that the category concepts themselves are ambiguous.

Cross-tabulations involving those items, which are subject to substantial levels of inconsistency may be subject to a large distortion as a consequence of the associated high level of response variance, and thus, are considered to be less reliable than comparable cross-tabulations which do not involve these data. As a consequence, the tables in this report, which contain such cross-tabulations, have been footnoted with a cautionary statement.

The 1970 census reinterview results provide illustrations of possible nonsampling errors for some of the items which also appear in the AHS. For example, median value of homes was consistently underestimated by about 5 percent, and the average monthly cost of electricity and utility gas were consistently overestimated although the net effect on average gross rent was fairly small.

TABLE VII. Standard Errors of Estimated Percentages of Housing Units Pertaining to New Construction, Lacking Complete Kitchen Facilities, No Bedrooms, No Bathrooms, Source of Water-Individual Well, Lacking Complete Plumbing, Mobile Homes, and Housing Units With Spanish-Origin Householder: 1980

(68 chances out of 100)

Base of percentage (000)	Estimated percentage

50,000	—	0.07	0.10	0.15	0.2	0.2	0.3	0.3

A possible explanation for the results of the AHS and census reinterview studies, as well as the surveys themselves, is that the respondents may lack precise information. Also, because the results of the reinterview studies are derived from sample surveys, there is sampling error associated with these estimates of nonsampling error. Therefore, the possibility of such errors should be taken into account when considering the results of these studies.

Coverage errors—A deficiency in the representation of conventional new construction for the AHS new construction sample (mentioned previously in the section on estimation) is an example of coverage errors. During the sampling of building permits, only those issued more than 5 months before the survey began were eligible to be selected to represent conventional new construction. Due to time constraints, it is not possible to sample units whose permits are issued less than 5 months in advance of the survey.

It is estimated that the 1980 AHS sample missed about 1.4 percent (i.e., about 251,000 units) or all conventional housing units built after April 1970 because the permits for these units, which were built before September 1980, were issued less than 5 months in advance of the survey. The second-stage of ratio estimation procedure was employed to reduce the effect of this deficiency although some bias in the AHS estimates of conventional new construction probably still exists. Review of the second-stage ratio estimation procedures indicates that we have consistently overcompensated for this deficiency every year since 1975 by ratio adjusting the new construction to counts of new construction for the end of interview period, which has been December or January, instead of October. This

overcompensation may inflate the new construction counts by 100,000 to 300,000 units.

In addition, the 1976 Coverage Improvement Program had certain deficiencies. First, when the canvassing was done to identify mobile home parks that were not in the same sample frame or not on the commercial lists, only 92 percent of the census address frame ED's were represented. Second, it appears that the listing procedure (used to find mobile homes placed outside parks, units converted from nonresidential to residential, and houses that had been moved onto their present site) was not very efficient for finding nonresidential conversions (which might be primarily in business districts), since the listing procedure started from a residential unit. (The sample estimate of this component was approximately 16,000 housing units with a standard error of 12,000.)

Finally, it is felt that deficiencies also exist in ED's where area sampling methods are used. As before, it had been assumed that all units located inside these ED's would be represented in the sample. However, it has been estimated that the 1980 AHS sample missed as much as 2 percent (i.e., as much as 400,000 units) of all housing units in ED's where area sampling methods are used because these units are not listed during the canvassing.

The third stage of ratio estimation corrects for these deficiencies as far as the count of total housing is concerned, i.e., it adjusts the estimate of the total housing inventory to the best available estimate. However, biases of subtotals would still remain.

Rounding errors—In errors associated with processing, the rounding of estimates introduces another source of error in the data, the severity of which depends on the statistic being

TABLE VIII. Standard Errors of Estimated Percentages of Housing Units Pertaining to the Northeast, North Central, South, and West Regions: 1980 (Excluding Estimated Percentages Pertaining to New Construction, Lacking Complete Kitchen Facilities, No Bedrooms, No Bathrooms, and Lacking Complete Plumbing for the Northeast, North Central, and West Regions and Excluding Source of Water-Individual Well, and Mobile Homes for Each of the Regions)

(68 chances out of 100)

Base of percentage (000)	Estimated percentage							
	0 or 100	1 or 99	2 or 98	5 or 95	10 or 90	15 or 85	25 or 75	50

measured. The effect of rounding is significant relative to the sampling error only for small percentages, median number of persons, and median number of rooms when these figures are derived from relatively large bases. This means that confidence intervals formed from the standard errors given may be dis-

torted, and this should be taken into account when considering the results of this survey. Also since medians in this report were computed using unrounded data, instead of the published rounded data, they can differ from medians calculated directly from the published data.

TABLE IX. Standard Errors of Estimated Percentages of Housing Units Pertaining to New Construction, Lacking Complete Kitchen Facilities, No Bedrooms, No Bathrooms, and Lacking Complete Plumbing for the Northeast, North Central, and West Regions and to Source of Water-Individual Well, and Mobile Homes for the Northeast and North Central Regions: 1980

(68 chances out of 100. For estimated percentages pertaining to source of water-individual well and mobile homes for the West Region, apply a factor of 1.66 to the standard errors listed below)

Base of percentage (000)	Estimated percentage							
	0 or 100	1 or 99	2 or 98	5 or 95	10 or 90	15 or 85	25 or 75	50
5	34.3	34.3	34.3	34.3	34.3	34.3	34.3	36.1
10	20.7	20.7	20.7	20.7	20.7	20.7	22.1	25.5
